1 INTRODUCTION

The MSCI USA ESG Select Index is designed to maximize exposure to positive environmental, social and governance (ESG) factors while exhibiting risk and return characteristics similar to those of the MSCI USA Index. The Index is sector-diversified and targets high ESG ratings in each sector. Relative to the MSCI USA Index, the MSCI USA ESG Select Index tends to overweight companies with higher ESG ratings and under-weight companies with lower ratings. Tobacco companies are not eligible for inclusion into the Index.

2 ESG RESEARCH FRAMEWORK

MSCI ESG Research provides in-depth research, ratings and analysis of the environmental, social and governance-related business practices of thousands of companies worldwide. It consists of an integrated suite of tools and products to efficiently manage research, analysis and compliance tasks across the spectrum of ESG factors.

2.1 MSCI ESG INTANGIBLE VALUE ASSESSMENT

MSCI ESG Intangible Value Assessment (IVA) provides research, ratings and analysis of corporate management of environmental and social risk factors. Through an in-depth comparison against sector peers, MSCI ESG IVA can reveal ESG-driven investment risks or opportunities that may not be captured by conventional analyses.

MSCI ESG IVA identifies key ESG issues that hold the greatest potential risk or opportunity for each industry sector. The product also provides analysis for any impact that these issues and risks may have on corporate financial performance

MSCI ESG IVA scores and ranks company management of key issues relative to sector peers using a best-in-class ratings system, on a seven point scale from 'AAA' to 'CCC'. The model also provides granular scoring on environmental, social and governance metrics.

For more details on MSCI ESG IVA, please refer to
http://www.msci.com/resources/factsheets/MSCI_ESG_IVA.pdf

2.2 MSCI ESG IMPACT MONITOR

MSCI ESG Impact Monitor is designed to provide timely, consistent and extensive assessments of ESG controversies involving publicly traded companies. The evaluation framework used in MSCI ESG Impact Monitor is consistent with international norms represented in numerous, widely accepted, global conventions, including the UN Declaration of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work, and the UN Global Compact. Investors are able to assess company strategies, policies, systems, and disclosure with respect to these norms and principles.

For more details on MSCI ESG Impact Monitor, please refer to
http://www.msci.com/resources/factsheets/MSCI_ESG_Impact_Monitor.pdf

3 CONSTRUCTING THE MSCI USA ESG SELECT INDEX

Constructing the MSCI USA ESG Select Index involves the following steps:

- Defining the underlying MSCI Parent Index ('Parent Index');
- Defining the exclusion criteria;
- Defining the optimization constraints; and
- Determining the optimized portfolio

3.1 DEFINING THE PARENT INDEX

The Parent Index for the MSCI USA ESG Select Index is the MSCI USA Index, excluding any stocks with Tobacco involvement. Please refer to Appendix 1 for more details on this criterion.

3.2 DEFINING THE EXCLUSION CRITERIA

Securities having involvement in business controversies are not eligible for addition to the MSCI USA ESG Select Index. This is implemented by excluding all existing index constituents with an Impact Monitor controversy assessment of very severe (Impact Monitor score of 0 or 1) and all non-index constituents with an Impact Monitor controversy assessment of severe (Impact Monitor score of 2).

3.3 DEFINING THE OPTIMIZATION CONSTRAINTS

Constituents are selected to maximize exposure to company based ESG IVA scores, subject to maintaining risk and return characteristics similar to the MSCI USA Index. ESG scores are normalized and factored into the optimization process. Optimization is a quantitative process that considers the market capitalization weights from the MSCI USA Index, ESG scores and additional optimization constraints to select and weight the constituents in the Index.

Normalization of the ESG scores allows the optimization to assess each score in the context of the overall distribution of the ESG scores.

At each Quarterly Index Review, the following optimization constraints are used to ensure replicability and investability:

- The predicted tracking error is restricted to 1.8%
- The maximum weight of an index constituent will be 5%;

- The minimum weight of an index constituent will be 0.1%;
- The number of index constituents is constrained to a maximum of 350;
- The sector weights of the MSCI USA ESG Select Index will not deviate by more than +/- 3% from the sector weights of the MSCI USA Index;
- The one way turnover of the MSCI USA ESG Select Index is constrained to a maximum of 10% at Semi-Annual Index Reviews and 5% at Quarterly Index Reviews;
- One way transaction cost is set to 0.5% which aims to achieve a balance between turnover and ESG Scores; and
- An AS/CF (Asset Selection/Common Factor) Risk Aversion Ratio of 10 is applied.

Please refer to the Appendix 2 for the description of the handling of infeasible optimizations.

3.4 DETERMINING THE OPTIMIZED PORTFOLIO

The MSCI USA ESG Select Index is constructed using the most recent release of the Barra Open Optimizer in combination with the relevant Barra Equity Model. The optimization uses the MSCI USA Index ex stocks with Tobacco involvement as the universe of eligible securities and the specified optimization objective and constraints to determine the constituents of the MSCI USA ESG Select Index.

4 MAINTAINING THE MSCI USA ESG SELECT INDEX

4.1 QUARTERLY INDEX REVIEWS

The MSCI USA ESG Select Index is rebalanced on a quarterly basis to coincide with the regular Index Reviews (Semi-Annual Index Reviews in May and November and Quarterly Index Reviews in February and August) of the MSCI Global Investable Market Indexes. The changes are implemented at the end of February, May, August and November. The pro forma indexes are in general announced nine business days before the effective date.

ESG scores used for the Quarterly Index Reviews will be taken as of the end of the month preceding the Index Review, i.e., January, April, July and October.

At each Index Review, the optimization process outlined in Section 3 is implemented. Companies can only be added to the MSCI USA ESG Select Index at regular Index Reviews.

4.2 ONGOING EVENT-RELATED MAINTENANCE

In general, the MSCI USA ESG Select Index follows the event maintenance of the MSCI USA Index.

New additions to the MSCI USA Index due to corporate events will not be added simultaneously to the MSCI USA ESG Select Index, but will be considered for inclusion at the following Index Review. Companies deleted from the MSCI USA Index between Index Reviews due to corporate events maintenance are also deleted at the same time from the MSCI USA ESG Select Index.

The technical details relating to the handling of specific corporate event types can be found in the MSCI Corporate Events Methodology book available at:

<http://www.msci.com/products/indexes/size/standard/methodology.html>

APPENDIX 1: TOBACCO EXCLUSION CRITERIA

Companies which meet the following Tobacco involvement criteria are excluded from the MSCI USA ESG Select Index

- All companies classified as “Producer” or “Licensor”
- All companies classified as “Distributor”, “Retailer”, or “Supplier” that earn 15% or more of revenues from tobacco products
- All companies classified as “Ownership by a Tobacco Company” or “Ownership of a Tobacco Company”

APPENDIX 2: HANDLING INFEASIBLE OPTIMIZATIONS

During the Quarterly Index Review, in the event that there is no optimal solution that satisfies all the optimization constraints defined in Section 3.3, the tracking error will be relaxed in steps of 0.2% until an optimal solution is found.

APPENDIX 3: TRANSITION TO THE ENHANCED MSCI USA ESG SELECT INDEX METHODOLOGY

The MSCI USA ESG Select Index transitioned to the methodology described in the above document starting from the May 2012 Index Review. As part of the enhancements to the MSCI USA ESG Select Index Methodology, the annual turnover budget is reduced from 50% to 30% (10% at Semi-Annual Index Reviews and 5% at Quarterly Index Reviews). The lower annual turnover budget of 30% will be applied starting from the May 2012 Index Review.

This document and all of the information contained in it, including without limitation all text, data, graphs, charts (collectively, the “Information”) is the property of MSCI Inc. or its subsidiaries (collectively, “MSCI”), or MSCI’s licensors, direct or indirect suppliers or any third party involved in making or compiling any Information (collectively, with MSCI, the “Information Providers”) and is provided for informational purposes only. The Information may not be modified, reverse-engineered, reproduced or disseminated in whole or in part without prior written permission from MSCI.

The Information may not be used to create derivative works or to verify or correct other data or information. For example (but without limitation), the Information may not be used to create indexes, databases, risk models, analytics, software, or in connection with the issuing, offering, sponsoring, managing or marketing of any securities, portfolios, financial products or other investment vehicles utilizing or based on, linked to, tracking or otherwise derived from the Information or any other MSCI data, information, products or services.

The user of the Information assumes the entire risk of any use it may make or permit to be made of the Information. NONE OF THE INFORMATION PROVIDERS MAKES ANY EXPRESS OR IMPLIED WARRANTIES OR REPRESENTATIONS WITH RESPECT TO THE INFORMATION (OR THE RESULTS TO BE OBTAINED BY THE USE THEREOF), AND TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, EACH INFORMATION PROVIDER EXPRESSLY DISCLAIMS ALL IMPLIED WARRANTIES (INCLUDING, WITHOUT LIMITATION, ANY IMPLIED WARRANTIES OF ORIGINALITY, ACCURACY, TIMELINESS, NON-INFRINGEMENT, COMPLETENESS, MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE) WITH RESPECT TO ANY OF THE INFORMATION.

Without limiting any of the foregoing and to the maximum extent permitted by applicable law, in no event shall any Information Provider have any liability regarding any of the Information for any direct, indirect, special, punitive, consequential (including lost profits) or any other damages even if notified of the possibility of such damages. The foregoing shall not exclude or limit any liability that may not by applicable law be excluded or limited, including without limitation (as applicable), any liability for death or personal injury to the extent that such injury results from the negligence or willful default of itself, its servants, agents or sub-contractors.

Information containing any historical information, data or analysis should not be taken as an indication or guarantee of any future performance, analysis, forecast or prediction. Past performance does not guarantee future results.

The Information should not be relied on and is not a substitute for the skill, judgment and experience of the user, its management, employees, advisors and/or clients when making investment and other business decisions. All Information is impersonal and not tailored to the needs of any person, entity or group of persons.

None of the Information constitutes an offer to sell (or a solicitation of an offer to buy), any security, financial product or other investment vehicle or any trading strategy.

It is not possible to invest directly in an index. Exposure to an asset class or trading strategy or other category represented by an index is only available through third party investable instruments (if any) based on that index. MSCI does not issue, sponsor, endorse, market, offer, review or otherwise express any opinion regarding any fund, ETF, derivative or other security, investment, financial product or trading strategy that is based on, linked to or seeks to provide an investment return related to the performance of any MSCI index (collectively, “Index Linked Investments”). MSCI makes no assurance that any Index Linked Investments will accurately track index performance or provide positive investment returns. MSCI Inc. is not an investment adviser or fiduciary and MSCI makes no representation regarding the advisability of investing in any Index Linked Investments.

Index returns do not represent the results of actual trading of investable assets/securities. MSCI maintains and calculates indexes, but does not manage actual assets. Index returns do not reflect payment of any sales charges or fees an investor may pay to purchase the securities underlying the index or Index Linked Investments. The imposition of these fees and charges would cause the performance of an Index Linked Investment to be different than the MSCI index performance.

The Information may contain back tested data. Back-tested performance is not actual performance, but is hypothetical. There are frequently material differences between back tested performance results and actual results subsequently achieved by any investment strategy.

Constituents of MSCI equity indexes are listed companies, which are included in or excluded from the indexes according to the application of the relevant index methodologies. Accordingly, constituents in MSCI equity indexes may include MSCI Inc., clients of MSCI or suppliers to MSCI. Inclusion of a security within an MSCI index is not a recommendation by MSCI to buy, sell, or hold such security, nor is it considered to be investment advice.

Data and information produced by various affiliates of MSCI Inc., including MSCI ESG Research Inc. and Barra LLC, may be used in calculating certain MSCI indexes. More information can be found in the relevant index methodologies on www.msci.com.

MSCI receives compensation in connection with licensing its indexes to third parties. MSCI Inc.’s revenue includes fees based on assets in Index Linked Investments. Information can be found in MSCI Inc.’s company filings on the Investor Relations section of www.msci.com.

MSCI ESG Research Inc. is a Registered Investment Adviser under the Investment Advisers Act of 1940 and a subsidiary of MSCI Inc. Except with respect to any applicable products or services from MSCI ESG Research, neither MSCI nor any of its products or services recommends, endorses, approves or otherwise expresses any opinion regarding any issuer, securities, financial products or instruments or trading strategies and MSCI’s products or services are not intended to constitute investment advice or a recommendation to make (or refrain from making) any kind of investment decision and may not be relied on as such. Issuers mentioned or included in any MSCI ESG Research materials may include MSCI Inc., clients of MSCI or suppliers to MSCI, and may also purchase research or other products or services from MSCI ESG Research. MSCI ESG Research materials, including materials utilized in any MSCI ESG Indexes or other products, have not been submitted to, nor received approval from, the United States Securities and Exchange Commission or any other regulatory body.

Any use of or access to products, services or information of MSCI requires a license from MSCI. MSCI, Barra, RiskMetrics, IPD, FEA, InvestorForce, and other MSCI brands and product names are the trademarks, service marks, or registered trademarks of MSCI or its subsidiaries in the United States and other jurisdictions. The Global Industry Classification Standard (GICS) was developed by and is the exclusive property of MSCI and Standard & Poor’s. “Global Industry Classification Standard (GICS)” is a service mark of MSCI and Standard & Poor’s.
