

MSCI RUSSIA 25/50 INDEX (USD)

The MSCI Russia 25/50 Index is designed to measure the performance of the large and mid cap segments of the Russian market. It applies certain investment limits that are imposed on regulated investment companies, or RICs, under the current US Internal Revenue Code. With 23 constituents, the index covers approximately 85% of the free float-adjusted market capitalization in Russia.

CUMULATIVE INDEX PERFORMANCE - NET RETURNS (USD) (AUG 2009 – DEC 2019)

ANNUAL PERFORMANCE (%)

Year	MSCI Russia 25-50	MSCI Emerging Markets	MSCI ACWI IMI
2019	49.13	18.42	26.35
2018	-2.63	-14.57	-10.08
2017	4.36	37.28	23.95
2016	55.49	11.19	8.36
2015	4.51	-14.92	-2.19
2014	-44.92	-2.19	3.84
2013	-2.44	-2.60	23.55
2012	14.67	18.22	16.38
2011	-20.66	-18.42	-7.89
2010	22.57	18.88	14.35

³ Based on ICE LIBOR 1M

The MSCI Russia 25/50 Index was launched on Jan 18, 2010. Data prior to the launch date is back-tested data (i.e. calculations of how the index might have performed over that time period had the index existed). There are frequently material differences between back-tested performance and actual results. Past performance -- whether actual or back-tested -- is no indication or guarantee of future performance.

MSCI FaCS provides absolute factor exposures relative to a broad global index - MSCI ACWI IMI.

Neutral factor exposure (FaCS = 0) represents MSCI ACWI IMI.

SECTOR WEIGHTS

- Energy 48.53%
- Materials 21.05%
- Financials 18.85%
- Consumer Staples 5.7%
- Communication Services 3.41%
- Utilities 2.47%

INDEX METHODOLOGY

The MSCI 25/50 Indexes take into account the investment limits required of regulated investment companies, or RICs, under the current US Internal Revenue Code. One requirement of a RIC is that at the end of each quarter of its tax year no more than 25% of the value of the RIC's assets may be invested in a single issuer and the sum of the weights of all issuers representing more than 5% of the fund should not exceed 50% of the fund's total assets.

The MSCI 25/50 Index methodology aims to minimize index turnover, tracking error and extreme deviation from the parent index. The indexes are rebalanced quarterly. Changes resulting from each rebalancing are made as of the close of the last business day of February, May, August and November, coinciding with the quarterly index reviews of their parent indexes.

FACTOR BOX AND FaCS METHODOLOGY

MSCI FaCS is a standard method ([MSCI FaCS Methodology](#)) for evaluating and reporting the Factor characteristics of equity portfolios. MSCI FaCS consists of Factor Groups (e.g. Value, Size, Momentum, Quality, Yield, and Volatility) that have been extensively documented in academic literature and validated by MSCI Research as key drivers of risk and return in equity portfolios. These Factor Groups are constructed by aggregating 16 factors (e.g. Book-to-Price, Earnings/Dividend Yields, LT Reversal, Leverage, Earnings Variability/Quality, Beta) from the latest Barra global equity factor risk model, GEMLT, designed to make fund comparisons transparent and intuitive for use. The MSCI Factor Box, which is powered by MSCI FaCS, provides a visualization designed to easily compare absolute exposures of funds/indexes and their benchmarks along 6 Factor Groups that have historically demonstrated excess market returns over the long run.

ABOUT MSCI

MSCI is a leading provider of critical decision support tools and services for the global investment community. With over 45 years of expertise in research, data and technology, we power better investment decisions by enabling clients to understand and analyze key drivers of risk and return and confidently build more effective portfolios. We create industry-leading research-enhanced solutions that clients use to gain insight into and improve transparency across the investment process. To learn more, please visit www.msci.com.
