

MSCI Japan Infrastructure 20/35 Capped Index (JPY)

The **MSCI Japan Infrastructure 20/35 Capped Index** captures the opportunity set of companies that are owners or operators of infrastructure assets. The weight of the largest group entity in the index is constrained to 35% and the weights of all other entities are constrained to a maximum of 20%. Index constituents are selected from the equity universe of MSCI Japan, the parent index, which covers mid and large cap securities. Each constituent is categorized in one of thirteen sub-industries according to the Global Industry Classification Standard (GICS®), which MSCI has aggregated into five broadly diversified *infrastructure sectors*: Telecommunication Infrastructure, Utilities, Energy Infrastructure, Transportation Infrastructure and Social Infrastructure.

For a complete description of the index methodology, please see [Index methodology - MSCI](#).

The MSCI Japan Infrastructure 20/35 Capped Index was launched on Jul 26, 2013. Data prior to the launch date is back-tested test (i.e. calculations of how the index might have performed over that time period had the index existed). There are frequently material differences between back-tested performance and actual results. Past performance – whether actual or back-tested – is no indication or guarantee of future performance.

ABOUT MSCI
