# MSCI USA SRI Select Reduced Fossil Fuels Index (USD)

The MSCI USA SRI Select Reduced Fossil Fuels Index is based on the MSCI USA Index, its parent index, and includes large and mid-cap securities of the U.S equity market. The index aims to represent the performance of companies that are consistent with specific values and climate change based criteria, as well as exhibit a high minimum level of ESG performance. The Index is designed for investors seeking a diversified Socially Responsible Investment (SRI) benchmark comprised of companies with strong sustainability profiles while avoiding companies incompatible with values screen or having exposure to fossil fuels through extraction and production activities, power generation activities or reserves ownership. Constituent selection is based on research provided by MSCI ESG Research. The Index is float-adjusted market capitalization weighted and a 5% capping is applied on issuer weights in the Index.

For a complete description of the index methodology, please see Index methodology - MSCI.

### **SECTOR WEIGHTS**

The MSCI USA SRI Select Reduced Fossil Fuels Index was launched on Oct 04, 2019. Data prior to the launch date is back-tested test (i.e. calculations of how the index might have performed over that time period had the index existed). There are frequently material differences between back-tested performance and actual results. Past performance – whether actual or back-tested – is no indication or guarantee of future performance.
