

MSCI EM Climate Paris Aligned PAB 100% Hedged to USD Net Index (USD)

The MSCI EM Climate Paris Aligned PAB 100% Hedged to USD Net Index represents a close estimation of the performance that can be achieved by hedging the currency exposures of its parent index, the MSCI Emerging Markets Climate Paris Aligned Index, to the USD, the "home" currency for the hedged index. The index is 100% hedged to the USD by selling each foreign currency forward at the one-month Forward rate. The parent index is composed of large and mid-cap stocks across 24 Emerging Markets (EM) countries*. The index is designed to support investors seeking to reduce their exposure to transition and physical climate risks and who wish to pursue opportunities arising from the transition to a lower-carbon economy while aligning with the Paris Agreement requirements. The index incorporates the TCFD recommendations and are designed to exceed the minimum standards of the EU Paris-Aligned Benchmark.

For a complete description of the index methodology, please see [Index methodology - MSCI](#).
