

MSCI Select OECD Emerging Markets GDP Weighted Index (USD)

The **MSCI Select OECD Emerging Markets GDP Weighted Index** is based on the flagship MSCI Select OECD Index, its parent index, and includes large and mid cap stocks across 7 Emerging Markets (EM) countries*. The index uses a different weighting scheme than its cap weighted parent index, however. The weight of each country in the index is derived from its economic size (using GDP data) rather than the size of its equity market.

For a complete description of the index methodology, please see [Index methodology - MSCI](#).
