

MSCI World 100% Hedged to AUD Index (AUD)

The **MSCI World 100% Hedged to AUD Index** represents a close estimation of the performance that can be achieved by hedging the currency exposures of its parent index, the MSCI World Index, to the AUD, the "home" currency for the hedged index. The index is 100% hedged to the AUD by selling each foreign currency forward at the one-month Forward rate. The parent index is composed of large and mid cap stocks across 23 Developed Markets (DM) countries* and its local performance is calculated in 13 different currencies, including the Euro.

For a complete description of the index methodology, please see [Index methodology - MSCI](#).
