MSCI World Climate Change Paris Aligned Select PAB Index (USD)

The MSCI World Climate Change Paris Aligned Select PAB Index is an index constructed from the MSCI World Climate Change Index and includes large and mid-cap securities across 23 Developed Markets (DM) countries.* The Index aims to represent the performance of an investment strategy that reweights securities based upon the opportunities and risks associated with the climate transition risks and opportunities and to satisfy the minimum requirements as detailed for an EU Paris-Aligned Benchmark in EU Benchmark Regulations.** The Index methodology is designed to exclude securities of companies based on their revenues from the manufacture of tobacco products and thermal coal based power generation. To avoid concentration, the Index is then capped as per the MSCI 10/40 Indexes methodology.

For a complete description of the index methodology, please see Index methodology - MSCI.

CUMULATIVE INDEX PERFORMANCE — NET RETURNS (USD) (NOV 2013 – SEP 2026)

SECTOR WEIGHTS

COUNTRY WEIGHTS

*DM countries include: Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Hong Kong, Ireland, Israel, Italy, Japan, Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland, the UK and the US.

**The requirements for the EU Paris-Aligned Benchmarks (PABs) are given by the relevant EU Delegated Act, that is, Regulation (EU) 2016/1011 as amended by Regulation (EU) 2019/2089. Due to a technical issue, a screen to exclude companies with oil & gas revenue temporarily was not applied per the Index's PAB methodology as part of the May 2022 Semi-Annual Index Review. The inclusion of such companies (accounting for slightly over 1% of the weight of companies in the Index) did not meet PAB criteria. MSCI reapplied the screen and removed such companies in accordance with PAB criteria before its November 2022 Semi-Annual Index Review effective on December 1, 2022.

ABOUT MSCI
