### INDEX METHODOLOGY

MSCI Europe ESG Leaders Select 5% Issuer Capped Index is a capped version of the MSCI Europe ESG Leaders Index that limits company concentration by constraining the maximum weight of a company in the MSCI Europe ESG Leaders Index to 5% at each Index Review. The weight of the securities outside the capped group will be increased in proportion to their market cap weights.

The MSCI Europe ESG Leaders Index is constructed by applying a Best-in-Class selection process to companies in the regional indexes that make up MSCI Europe Index, a global equity index consisting of equities from developed market countries. The methodology aims to include securities of companies with the highest ESG ratings representing 50% of the market capitalization in each sector and region of the parent Index. Companies that are not existing constituents must have an MSCI ESG Rating of 'BB' or above and the MSCI ESG Controversies Score of 3 or above to be eligible. In addition, companies showing involvement in thermal coal, tobacco, alcohol, gambling, nuclear power and weapons, conventional weapons, controversial weapons and civilian firearms are excluded from the Index.

The Index is reconstituted annually at the May Semi-Annual Index Review and rebalanced at the February and August Quarterly Index Reviews and the November Semi-Annual Index Review.
