MSCI World 100% Hedged to GBP Index (GBP)

The MSCI World 100% Hedged to GBP Index represents a close estimation of the performance that can be achieved by hedging the currency exposures of its parent index, the MSCI World Index, to the GBP, the "home" currency for the hedged index. The index is 100% hedged to the GBP by selling each foreign currency forward at the one-month Forward rate. The parent index is composed of large and mid cap stocks across 23 Developed Markets (DM) countries* and its local performance is calculated in different currencies.
