

MSCI North America ESG Broad CTB Select 100% Hedged to GBP Index (GBP)

The MSCI North America ESG Broad CTB Select 100% Hedged to GBP Index represents a close estimation of the performance that can be achieved by hedging the currency exposures of its parent index, the MSCI North America ESG Broad CTB Select Index, to the GBP, the "home" currency for the hedged index. The index is 100% hedged to the GBP by selling each foreign currency forward at the one-month Forward rate. The parent index includes large and midcap securities of the US and Canada markets. The index aims to maximize exposure to positive environmental, social and governance (ESG) factors while maintaining risk and return characteristics similar to those of the respective underlying market capitalization weighted indexes. Additionally, the index aims to exceed the minimum technical requirements laid out for EU Climate Transition Benchmarks in the EU Delegated Acts.
