MSCI Launches New Asia and China Equity Analytics Models
Enhanced equity models set new standard for measuring and managing risk

New York – December 19, 2014 – MSCI Inc. (NYSE: MSCI), a leading provider of investment decision support tools worldwide, today announced two next generation Barra risk models aimed at helping firms who invest in China and greater-Asia markets better understand risk and performance.

The new Barra Asia Pacific Equity and Barra China International Equity models, which cover pan-Asian and China markets, respectively, have been significantly enhanced to include Systematic Equity Strategies (SES), marking a new era for advancing the standard for measuring and managing risk.

SES, when represented as factors in risk models, allow investment managers to better understand and monitor the sources of risk and return in equity portfolios while capturing volatility and correlation among stocks consistent with their short, medium or long-term investment horizons. Using models enhanced with SES also enables investors to better manage their exposure to crowded factors.

Rene Veerman, Managing Director and Head of Equity Analytics for Asia Pacific at MSCI, said, “Today marks a new milestone in providing institutional investors investing in China and Asia a new level of insight into uncovering important new sources of risk and return.”

Each model includes:
- The ability to adapt to rapid risk-on risk-off market movements with Volatility Regime Adjustment
- Improved portfolio optimization with Optimization Bias Adjustment
- Robust Specific Risk Model incorporating Bayesian Adjustments for greater forecast accuracy
- New Daily-horizon model to track very short term volatility. Long and Short versions are also available.
- Daily updates

Peter Zangari, Managing Director and Head of MSCI’s Portfolio Management Analytics, said, “For over 30 years MSCI’s Barra models have helped investors uncover risk in their portfolios through research-based innovation. The rollout of these new enhanced models is another example of our continued investment in innovation and our commitment to helping investment professionals by delivering ground-breaking research, models and software to help identify risk and sources of return.”

None of the Information constitutes an offer to sell (or a solicitation of an offer to buy), any security, financial product or other investment vehicle or any trading strategy.

It is not possible to invest directly in an index. Exposure to an asset class or trading strategy or other category represented by an index is only available through third party investable instruments (if any) based on that index. MSCI does not issue, sponsor, endorse, market, offer, review or otherwise express any opinion regarding any fund, ETF, derivative or other security, investment, financial product or trading strategy that is based on, linked to or seeks to provide an investment return related to the performance of any MSCI index (collectively, “Index Linked Investments”). MSCI makes no assurance that any Index Linked Investments will accurately track index performance or provide positive investment returns. MSCI Inc. is not an investment adviser or fiduciary and MSCI makes no representation regarding the advisability of investing in any Index Linked Investments.

Index returns do not represent the results of actual trading of investible assets/securities. MSCI maintains and calculates indexes, but does not manage actual assets. Index returns do not reflect payment of any sales charges or fees an investor may pay to purchase the securities underlying the index or Index Linked Investments. The imposition of these fees and charges would cause the performance of an Index Linked Investment to be different than the MSCI index performance.

The Information may contain back tested data. Back tested performance is not actual performance, but is hypothetical. There are frequently material differences between back tested performance results and actual results subsequently achieved by any investment strategy.

Constituents of MSCI equity indexes are listed companies, which are included in or excluded from the indexes according to the application of the relevant index methodologies. Accordingly, constituents in MSCI equity indexes may include MSCI Inc., clients of MSCI or suppliers to MSCI. Inclusion of a security within an MSCI index is not a recommendation by MSCI to buy, sell, or hold such security, nor is it considered to be investment advice.

Data and information produced by various affiliates of MSCI Inc., including MSCI ESG Research Inc. and Barra LLC, may be used in calculating certain MSCI equity indexes. More information can be found in the relevant standard equity index methodologies on www.msci.com.

MSCI receives compensation in connection with licensing its indexes to third parties. MSCI Inc.’s revenue includes fees based on assets in investment products linked to MSCI equity indexes. Information can be found in MSCI’s company filings on the Investor Relations section of www.msci.com.
