

MSCI Emerging Markets Dividend Masters Index (USD)

The MSCI Emerging Markets (EM) Dividend Masters Index captures large and mid-cap representation across 26 EM countries*. The index is designed to capture the performance of companies in MSCI EM that have consistently increased dividends every year for at least 7 years. The index is constructed by targeting a minimum of 40 securities and the index constituents are equally weighted. The sector weights are capped at 30% and country weights are capped at 50% to mitigate potential concentration risks.

CUMULATIVE INDEX PERFORMANCE – NET RETURNS (USD) (JUL 2005 – JUL 2020)

ANNUAL PERFORMANCE (%)

Year	MSCI EM Dividend Masters	MSCI Emerging Markets
2019	14.79	18.42
2018	-5.38	-14.57
2017	32.50	37.28
2016	5.10	11.19
2015	-10.30	-14.92
2014	8.63	-2.19

The MSCI Emerging Markets Dividend Masters Index was launched on Jul 14, 2014. Data prior to the launch date is back-tested data (i.e. calculations of how the index might have performed over that time period had the index existed). There are frequently material differences between back-tested performance and actual results. Past performance – whether actual or back-tested – is no indication or guarantee of future performance.

COUNTRY WEIGHTS

INDEX METHODOLOGY

The [MSCI Dividend Masters Indexes](#) are constructed by targeting a minimum number of securities that have consistently increased dividends every year for a specific number of consecutive years. The index constituents are equally weighted and are diversified across GICS® sectors and countries. The sector and country weights are capped at defined thresholds to mitigate concentration risks. The Indexes are reconstituted annually and the constituent weights are reset to equal weights at every quarter.

FACTOR BOX AND FaCS METHODOLOGY

MSCI FaCS is a standard method ([MSCI FaCS Methodology](#)) for evaluating and reporting the Factor characteristics of equity portfolios. MSCI FaCS consists of Factor Groups (e.g. Value, Size, Momentum, Quality, Yield, and Volatility) that have been extensively documented in academic literature and validated by MSCI Research as key drivers of risk and return in equity portfolios. These Factor Groups are constructed by aggregating 16 factors (e.g. Book-to-Price, Earnings/Dividend Yields, LT Reversal, Leverage, Earnings Variability/Quality, Beta) from the latest Barra global equity factor risk model, GEMLT, designed to make fund comparisons transparent and intuitive for use. The MSCI Factor Box, which is powered by MSCI FaCS, provides a visualization designed to easily compare absolute exposures of funds/indexes and their benchmarks along 6 Factor Groups that have historically demonstrated excess market returns over the long run.

ABOUT MSCI

MSCI is a leading provider of critical decision support tools and services for the global investment community. With over 45 years of expertise in research, data and technology, we power better investment decisions by enabling clients to understand and analyze key drivers of risk and return and confidently build more effective portfolios. We create industry-leading research-enhanced solutions that clients use to gain insight into and improve transparency across the investment process. To learn more, please visit www.msci.com.
