

# MSCI EM Latin America 10/40 Index (USD)

The MSCI EM Latin America 10/40 Index is designed to measure the performance of the large and mid cap segments across 6 Emerging Market (EM) countries\* in Latin America. With 102 constituents, the index covers approximately 85% of the free float-adjusted market capitalization in each country. The MSCI 10/40 equity indexes are designed and maintained on a daily basis to take into consideration the 10% and 40% concentration constraints on funds subject to the UCITS III Directive.

## CUMULATIVE INDEX PERFORMANCE – GROSS RETURNS (USD) (MAR 2006 – MAR 2021)

## ANNUAL PERFORMANCE (%)

Year	MSCI EM Latin America 10/40	MSCI Emerging Markets	MSCI ACWI IMI

\* EM Latin America countries include: Argentina, Brazil, Chile, Colombia, Mexico and Peru.

The MSCI EM Latin America 10/40 Index was launched on Feb 12, 2008. Data prior to the launch date is back-tested data (i.e. calculations of how the index might have performed over that time period had the index existed). There are frequently material differences between back-tested performance and actual results. Past performance – whether actual or back-tested – is no indication or guarantee of future performance.

**INDEX METHODOLOGY**

Funds incorporated in member states of the European Union are subject to the UCITS III (Undertakings for Collective Investment in Transferable Securities) directive. In this directive (among other restrictions) a fund cannot invest more than 5% of its assets in securities issued by a single issuer. This limit can be increased up to 10%, provided that wherever the 5% limit is surpassed, the fund’s exposure to these “larger” assets does not exceed 40% of the funds’ total assets.

The MSCI 10/40 Indexes are constructed and maintained as pertinent benchmarks for UCITS III compliant funds that must meet these diversification requirements. Each MSCI 10/40 Index applies the 10/40 weighting constraints to an unconstrained MSCI index, the parent index. Whenever a weighting constraint is breached, the MSCI 10/40 Index rebalances to maintain UCITS III compliance.

The [MSCI 10/40 Index Methodology](#) also aims to maintain index stability, minimize tracking error versus the parent index and minimize index turnover.

**ABOUT MSCI**

MSCI is a leading provider of critical decision support tools and services for the global investment community. With over 45 years of expertise in research, data and technology, we power better investment decisions by enabling clients to understand and analyze key drivers of risk and return and confidently build more effective portfolios. We create industry-leading research-enhanced solutions that clients use to gain insight into and improve transparency across the investment process.
