MSCI ACWI with Developed Markets 100% Hedged to CHF Index (CHF)

The MSCI ACWI with Developed Markets 100% Hedged to CHF Index represents a close estimation of the performance that can be achieved by hedging the currency exposures of its parent index, the MSCI ACWI Index, to the CHF, the "home" currency for the hedged index. The index's exposure to developed market country constituents is 100% hedged to the CHF by selling each foreign currency forward at the one-month Forward rate. The parent index is composed of large and mid cap stocks across 23 Developed Markets (DM) countries and 24 Emerging Markets (EM) countries*.

For a complete description of the index methodology, please see Index methodology - MSCI.

¹ Based on monthly net returns data

The MSCI ACWI with Developed Markets 100% Hedged to CHF Index was launched on Jan 15, 2015. Data prior to the launch date is back-tested test (i.e. calculations of how the index might have performed over that time period had the index existed). There are frequently material differences between back-tested performance and actual results. Past performance — whether actual or back-tested — is no indication or guarantee of future performance.
