

MSCI ACWI ex Thermal Coal Adaptive Capped 2.0x Universal Index (USD)

The MSCI ACWI ex Thermal Coal Adaptive Capped 2.0x Universal Index is based on MSCI ACWI Index, its parent index and captures large and mid-cap representation across 23 Developed Markets (DM) and 24 Emerging Markets (EM) countries*. The index follows a capping approach where the cap level on the constituent weights of the larger stocks at each rebalance is not explicitly specified but is instead determined by the pre-defined maximum weight multiple applied to the smaller (uncapped) constituents of the parent index. The index seeks to gain exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile, using minimal exclusions from the MSCI ACWI Index.

For a complete description of the index methodology, please see [Index methodology - MSCI](#).
