

MSCI ACWI SRI Low Carbon Select 5% Issuer Capped with Developed Markets 100% Hedged to EUR Index (EUR)

The MSCI ACWI SRI Low Carbon Select 5% Issuer Capped with Developed Markets 100% Hedged to EUR Index represents a close estimation of the performance that can be achieved by hedging the currency exposures of its parent index, the MSCI ACWI Index, to the EUR, the "home" currency for the hedged index. The index's exposure to developed market country constituents is 100% hedged to the EUR by selling each foreign currency forward at the one-month Forward rate. The parent index is composed of large and mid-cap stocks across 23 Developed Markets (DM) countries and 24 Emerging Markets (EM) countries*. The index is designed to represent the performance of companies that have lower carbon exposure than that of the broad market and have high Environmental, Social and Governance (ESG) performance. Further, the Index also aims to avoid concentration by capping issuers within the Index to a maximum weight of 5% in accordance with the MSCI Capped Indexes methodology.

For a complete description of the index methodology, please see [Index methodology - MSCI](#).
