

MSCI ACWI Universal LC Sel 5% Issuer Capped with DM 100% Hedged to EUR Index (EUR)

The MSCI ACWI Universal Low Carbon Select 5% Issuer Capped with Developed Markets 100% Hedged to EUR Index represents a close estimation of the performance that can be achieved by hedging the currency exposures of its parent index, the MSCI ACWI Universal Low Carbon Select 5% Issuer Capped Index, to the USD, the "home" currency for the hedged index. The index's exposure to developed market country constituents is 100% hedged to the EUR by selling each foreign currency forward at the one-month Forward rate. The parent index is composed of large and mid-cap stocks across 23 DM countries and 24 EM countries*. The index aims to represent the performance of an investment strategy that by re-weighting free-float market cap weights based upon certain ESG metrics seeks to increase exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile, while excluding companies based on various ESG and climate change criteria.

For a complete description of the index methodology, please see [Index methodology - MSCI](#).
