

MSCI United Kingdom IMI Core Real Estate Volatility Tilt Index (GBP)

The **MSCI United Kingdom IMI Core Real Estate Volatility Tilt Index** captures large, mid & small cap representation of the UK Market. The index is a free float-adjusted market capitalization index that consists of large, mid and small cap stocks engaged in the ownership, development and management of specific core property type real estate. The index exclude companies, such as real estate services and real estate financing companies, that do not own properties. The indexes are created by tilting the market capitalization weights of all the constituents in the parent index based on the inverse of security price variance and then re-weighting them.

For a complete description of the index methodology, please see [Index methodology - MSCI](#).

CUMULATIVE INDEX PERFORMANCE – NET RETURNS (GBP) (APR 2010 – APR 2025)

ANNUAL PERFORMANCE (%)

Year	MSCI United Kingdom IMI Core Real Estate Volatility Tilt	MSCI United Kingdom IMI
2024	-12.22	9.09
2023	8.82	7.96
2022	-32.31	1.61
2021	29.17	18.66
2020	-13.57	-11.78
2019	32.92	18.41
2018	-12.08	-9.76
2017	12.10	12.99

¹ Last 12 months

² Based on monthly net returns data

³ Based on Bank of England Overnight SONIA from Sep 1 2021 & on ICE LIBOR 1M prior that date

The MSCI United Kingdom IMI Core Real Estate Volatility Tilt Index was launched on Oct 20, 2014. Data prior to the launch date is back-tested test (i.e. calculations of how the index might have performed over that time period had the index existed). There are frequently material differences between back-tested performance and actual results. Past performance – whether actual or back-tested – is no indication or guarantee of future performance.

MSCI FaCS provides absolute factor exposures relative to a broad global index - MSCI ACWI IMI.

Neutral factor exposure (FaCS = 0) represents MSCI ACWI IMI.

SUB-INDUSTRY WEIGHTS

MSCI FACTOR BOX AND FaCS FRAMEWORK (Please refer to complete description of the MSCI FaCS methodology [here](#))

MSCI FaCS is a standard method for evaluating and reporting the Factor characteristics of equity portfolios. MSCI FaCS consists of Factor Groups (e.g. Value, Size, Momentum, Quality, Yield, and Volatility) that have been extensively documented in academic literature and validated by MSCI Research as key drivers of risk and return in equity portfolios. These Factor Groups are constructed by aggregating 16 factors (e.g. Book-to-Price, Earnings/Dividend Yields, LT Reversal, Leverage, Earnings Variability/Quality, Beta) from the latest Barra global equity factor risk model, GEMLT, designed to make fund comparisons transparent and intuitive for use. The MSCI Factor Box, which is powered by MSCI FaCS, provides a visualization designed to easily compare absolute exposures of funds/indexes and their benchmarks along 6 Factor Groups that have historically demonstrated excess market returns over the long run.

ABOUT MSCI

MSCI is a leading provider of critical decision support tools and services for the global investment community. With over 45 years of expertise in research, data and technology, we power better investment decisions by enabling clients to understand and analyze key drivers of risk and return and confidently build more effective portfolios. We create industry-leading research-enhanced solutions that clients use to gain insight into and improve transparency across the investment process. To learn more, please visit www.msci.com.
