

# MSCI Global Environment Select Index (USD)

The MSCI Global Environment Select Index is comprised of securities of companies that derive at least 75% of their revenues from environmentally beneficial products and services. The index is based on key environmental themes: Alternative Energy, Sustainable Water, Green Building, Pollution Prevention and Control, Energy Efficiency and Sustainable Agriculture. The index is further diversified by capping securities at 5%. The index aims to serve as a benchmark for investors seeking exposure to companies whose primary source of revenues increase the efficient use of scarce natural resources or mitigate the impact of environmental degradation. Constituent selection is based on data from MSCI ESG Research.

On September 1, 2010 the FTSE KLD indexes transitioned to the MSCI ESG Indexes. The former KLD indexes had multiple third party index calculators over time. Consequently the MSCI ESG index histories have been aggregated and compiled to create a continuous time series from a variety of sources—sources which may have followed different index calculation methodologies in some instances. The MSCI ESG Indexes use ratings and other data supplied by MSCI ESG Research Inc, a subsidiary of MSCI Inc.

The MSCI Global Environment Select Index was launched on Dec 02, 2020. Data prior to the launch date is back-tested test (i.e. calculations of how the index might have performed over that time period had the index existed). There are frequently material differences between back-tested performance and actual results. Past performance – whether actual or back-tested – is no indication or guarantee of future performance.
