# **MSCI Korea IMI Quality Capped Index (KRW)**

The MSCI Korea IMI Quality Capped Index is based on the MSCI Korea IMI Index, its parent index, which includes large, mid and small cap stocks of the Korean equity market. The index aims to capture the performance of quality growth stocks by identifying stocks with high quality scores based on three main fundamental variables: high return on equity (ROE), stable year-over-year earnings growth and low financial leverage. The index further limits concentration by constraining the maximum weight of a company to 30% on a daily basis.
