

MSCI USA Sector Neutral Quality Index (CAD)

The MSCI USA Sector Neutral Quality Index captures large and mid-cap representation across the US equity markets. The index aims to capture the performance of securities that exhibit stronger quality characteristics relative to their peers within the same GICS® sector by identifying stocks with high quality scores based on three main fundamental variables: high Return-on-Equity (ROE), low leverage and low earnings variability.

CUMULATIVE INDEX PERFORMANCE – NET RETURNS (CAD) (MAY 2008 – MAY 2023)

ANNUAL PERFORMANCE (%)

Year	MSCI USA Sector Neutral Quality	MSCI USA
2022	-14.90	-14.02
2021	25.58	25.38
2020	14.47	18.61
2019	26.86	24.26
2018	2.23	3.51
2017	13.74	13.23
2016	4.90	7.06
2015	24.73	20.75

² Based on monthly net returns data

The MSCI USA Sector Neutral Quality Index was launched on Dec 12, 2014. Data prior to the launch date is back-tested test (i.e. calculations of how the index might have performed over that time period had the index existed). There are frequently material differences between back-tested performance and actual results. Past performance – whether actual or back-tested – is no indication or guarantee of future performance.

INDEX FRAMEWORK

The [MSCI Sector Neutral Quality Index](#) aims to reflect the performance of securities that exhibit stronger quality characteristics relative to their peers within the same GICS® sector. They are constructed by using the Quality Score that is computed within the sector. The Indexes are constructed with a fixed number of securities approach. A fixed number of securities with the highest positive quality scores are determined for each MSCI Quality Index with the goal of achieving high exposure to the quality factor while maintaining sufficient index market capitalization and number of securities coverage. All securities eligible for inclusion in the MSCI Sector Neutral Quality Indexes are weighted by the product of their market cap weight in the parent index and their Quality Score. A composite quality z-score for each security is calculated by combining Z-scores of three winsorized fundamental variables namely, high Return-on-Equity(ROE), low leverage and low earnings variability. A sector-relative quality score is then derived from the composite quality z-score. It is arrived at by standardizing the composite quality z-score within each sector. The sector-relative quality scores are winsorized at +/- 3. The indexes are rebalanced semi-annually, as of the close of the last business day of November and May.

This summary is provided for illustrative purposes only and does not include all material elements of the index or its methodology. For a complete description of the index methodology, please see [Index methodology - MSCI](#).

MSCI FACTOR BOX AND FaCS FRAMEWORK (Please refer to complete description of the MSCI FaCS methodology [here](#))

MSCI FaCS is a standard method for evaluating and reporting the Factor characteristics of equity portfolios. MSCI FaCS consists of Factor Groups (e.g. Value, Size, Momentum, Quality, Yield, and Volatility) that have been extensively documented in academic literature and validated by MSCI Research as key drivers of risk and return in equity portfolios. These Factor Groups are constructed by aggregating 16 factors (e.g. Book-to-Price, Earnings/Dividend Yields, LT Reversal, Leverage, Earnings Variability/Quality, Beta) from the latest Barra global equity factor risk model, GEMLT, designed to make fund comparisons transparent and intuitive for use. The MSCI Factor Box, which is powered by MSCI FaCS, provides a visualization designed to easily compare absolute exposures of funds/indexes and their benchmarks along 6 Factor Groups that have historically demonstrated excess market returns over the long run.

ABOUT MSCI

MSCI is a leading provider of critical decision support tools and services for the global investment community. With over 45 years of expertise in research, data and technology, we power better investment decisions by enabling clients to understand and analyze key drivers of risk and return and confidently build more effective portfolios. We create industry-leading research-enhanced solutions that clients use to gain insight into and improve transparency across the investment process. To learn more, please visit www.msci.com.
