

MSCI ACWI SUSTAINABLE IMPACT INDEX (USD)

The MSCI ACWI Sustainable Impact Index is designed to identify listed companies whose core business addresses at least one of the world's social and environmental challenges, as defined by the United Nations Sustainable Development Goals. The Sustainable Impact categories include: nutritious products, treatment of major diseases, sanitary products, education, affordable housing, loans to small and medium size enterprises, alternative energy, energy efficiency, green building, sustainable water, and pollution prevention. To be eligible for inclusion in the Index, companies must generate at least 50% of their sales from one or more of the Sustainable Impact categories and maintain minimum environmental, social and governance (ESG) standards. The parent index is MSCI ACWI. Constituent selection is based on data from MSCI ESG Research.

The MSCI ACWI Sustainable Impact Index was launched on Feb 18, 2016. Data prior to the launch date is back-tested data (i.e. calculations of how the index might have performed over that time period had the index existed). There are frequently material differences between back-tested performance and actual results. Past performance -- whether actual or back-tested -- is no indication or guarantee of future performance.

INDEX METHODOLOGY

The MSCI ACWI Sustainable Impact Index is designed to identify listed companies whose core business addresses at least one of the world's social and environmental challenges, as defined by the United Nations Sustainable Development Goals (UN SDGs). The eligible securities for the MSCI ACWI Sustainable Impact Index are derived from MSCI ACWI Index, its parent index. To be eligible for inclusion in the Index, companies must generate at least 50% of their sales from one or more of the eleven Sustainable Impact categories. The Sustainable Impact categories include: nutritious products, drugs for major diseases, sanitary products, education, affordable housing, loans to small and medium size enterprises, alternative energy, energy efficiency, green building, sustainable water, and pollution prevention. Companies must maintain minimum environmental, social and governance (ESG) standards to be eligible for inclusion. Securities are weighted on the basis of sustainable impact dollar sales in proportion of the ratio of free-float adjusted market capitalization of security to total market capitalization of issuer. Sustainable impact dollar sales are computed using product of the trailing 12-month sales and the cumulative percentage of sales from the sustainable impact categories. Additionally, sector weights are capped at 20% and issuer weights are capped at 4%. The Index is rebalanced quarterly coinciding with the Quarterly Index Reviews of the parent ACWI Index.

ABOUT MSCI

For more than 40 years, MSCI's research-based indexes and analytics have helped the world's leading investors build and manage better portfolios. Clients rely on our offerings for deeper insights into the drivers of performance and risk in their portfolios, broad asset class coverage and innovative research. Our line of products and services includes indexes, analytical models, data, real estate benchmarks and ESG research. MSCI serves 99 of the top 100 largest money managers, according to the most recent P&I ranking. For more information, visit us at www.msci.com.
