MSCI Canada Enhanced Value Capped Index (CAD)

The MSCI Canada Enhanced Value Capped Index is based on its parent index, MSCI Canada Index, which includes large and mid-cap representation across the Canadian equity markets exhibiting overall value style characteristics, targeting the higher of 25 securities or 50% market cap coverage of the parent index. The index is designed to represent the performance of securities that exhibit higher value characteristics relative to their peers within the corresponding GICS® sector. The value investment style characteristics for index construction are defined using three variables: Price-to-Book Value, Price-to-Forward Earnings and Enterprise Value-to-Cash flow from Operations. The index applies a 10% security capping, applied at each semi-annual rebalance.

For a complete description of the index methodology, please see Index methodology - MSCI.

CUMULATIVE INDEX PERFORMANCE — GROSS RETURNS (CAD) (AUG 2011 – AUG 2026)

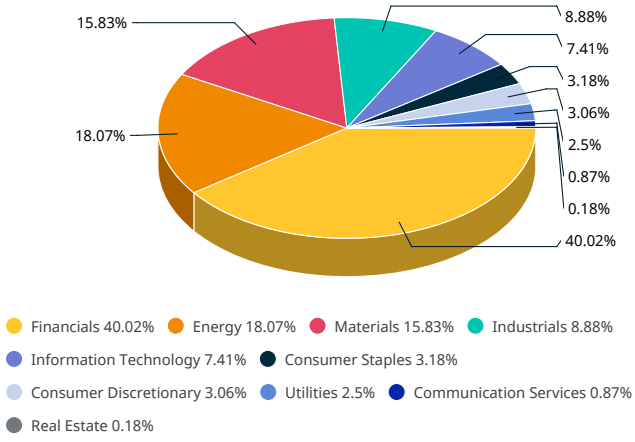
SECTOR WEIGHTS



The MSCI Canada Enhanced Value Capped Index was launched on Sep 26, 2017. Data prior to the launch date is back-tested test (i.e. calculations of how the index might have performed over that time period had the index existed). There are frequently material differences between back-tested performance and actual results. Past performance -- whether actual or back-tested -- is no indication or guarantee of future performance.

ABOUT MSCI

MSCI (NYSE: MSCI Inc.) strengthens global markets by connecting participants across the financial ecosystem with a common language.
