

# MSCI World High Dividend Yield 100% Hedged to CAD Index (CAD)

The MSCI World High Dividend Yield 100% Hedged to CAD Index represents a close estimation of the performance that can be achieved by hedging the currency exposures of its Parent Index, the MSCI World Index, to the CAD, the “home” currency for the hedged index. The Index is designed to reflect the performance of equities in the Parent Index (excluding REITs) with higher dividend income and quality characteristics than average dividend yields that are both sustainable and persistent. The index is 100% hedged to the CAD by selling each foreign currency forward at the one-month Forward rate. The parent index is composed of large and mid cap stocks across 23 Developed Markets (DM) countries\*.

For a complete description of the index methodology, please see [Index methodology - MSCI](#).

## CUMULATIVE INDEX PERFORMANCE – NET RETURNS (CAD) (JAN 2010 – JAN 2025)
