

# MSCI China Top 50 Select Index (USD)

The MSCI China Top 50 Select Index is based on the MSCI China Index, its parent index, which captures large- and mid-cap representation across China A, B and H shares, Red chips, P chips and foreign listings (e.g., American Depositary Receipts). The Index aims to represent the performance of the largest 50 securities from China which meet minimum size and liquidity requirements and uses a full inclusion weight for A shares. To avoid concentration, the Index is then capped as per the MSCI 10/50 Index methodology which constrains the weight of any single group entity to 10%, and the sum of the weights of all group entities with a weight of more than 5% at a maximum of 50%.

## CUMULATIVE INDEX PERFORMANCE – NET RETURNS (USD) (FEB 2008 – OCT 2020)

## ANNUAL PERFORMANCE (%)

Year	MSCI China Top 50 Select	MSCI China
2019	26.02	23.46
2018	-17.87	-18.88
2017	47.69	54.07
2016	0.76	0.90
2015	-11.88	-7.82
2014	9.93	7.96
2013	3.63	3.64
2012	22.13	22.75
2011	-14.03	-18.41
2010	4.65	4.63
2009	61.94	62.29

## INDEX PERFORMANCE – NET RETURNS (%) (OCT 30, 2020)

<sup>1</sup> Last 12 months

<sup>2</sup> Based on monthly net returns data

<sup>3</sup> Based on ICE LIBOR 1M

The MSCI China Top 50 Select Index was launched on Sep 03, 2018. Data prior to the launch date is back-tested data (i.e. calculations of how the index might have performed over that time period had the index existed). There are frequently material differences between back-tested performance and actual results. Past performance – whether actual or back-tested – is no indication or guarantee of future performance.

- Health Care 5.54%
- Real Estate 3.62%
- Industrials 2.4%
- Utilities 1.18%
- Energy 1.14%

## INDEX METHODOLOGY

The index is based on the [MSCI Global Investable Market Indexes \(GIMI\) Methodology](#)—a comprehensive and consistent approach to index construction that allows for meaningful global views and cross regional comparisons across all market capitalization size, sector and style segments and combinations. This methodology aims to provide exhaustive coverage of the relevant investment opportunity set with a strong emphasis on index liquidity, investability and replicability. The Index selects the largest 50 securities from China ranked by their free-float adjusted market capitalization. Additionally, the Index utilizes a 10/50 concentration constraint whereby the weight of each group entity in the Index is capped at 10% and the cumulative weight of all group entities with a weight in excess of 5% does not exceed 50% of the Index by weight.

The Index is reviewed quarterly—in February, May, August and November—with the objective of reflecting change in the underlying equity markets in a timely manner, while limiting undue index turnover. During the May and November semi-annual index reviews, the Index is rebalanced and the large, mid and small-capitalization cutoff points are recalculated.

## ABOUT MSCI

MSCI is a leading provider of critical decision support tools and services for the global investment community. With over 45 years of expertise in research, data and technology, we power better investment decisions by enabling clients to understand and analyze key drivers of risk and return and confidently build more effective portfolios. We create industry-leading research-enhanced solutions that clients use to gain insight into and improve transparency across the investment process.
