

MSCI Europe ex UK IMI Core Real Estate Volatility Tilt Index (EUR)

The **MSCI Europe ex UK IMI Core Real Estate Volatility Tilt Index** captures large and mid-cap representation across 14 Developed Markets (DM) countries in Europe*. The index is a free float-adjusted market capitalization index that consists of large, mid and small cap stocks engaged in the ownership, development and management of specific core property type real estate. The index exclude companies, such as real estate services and real estate financing companies, that do not own properties. The indexes are created by tilting the market capitalization weights of all the constituents in the parent index based on the inverse of security price variance and then re-weighting them.

For a complete description of the index methodology, please see [Index methodology - MSCI](#).
