

MSCI ACWI IMI Plastics Transition Index (USD)

The MSCI ACWI IMI Plastics Transition Index aims to represent the performance of a set of companies from MSCI ACWI IMI that are associated with key aspects of addressing the plastic waste issue through their products or services, and/or through their management of related issues, all assessed within the context of potential contribution towards a circular economy. The parent index MSCI ACWI IMI Index, includes large, mid and small-cap securities across 23 Developed Markets (DM) and 24 Emerging Markets (EM) countries*. The index also applies exclusions criteria to screen companies that are not considered aligned with the overall objective of protecting plastic waste issue or promoting circularity.

INDEX METHODOLOGY

The MSCI ACWI IMI Plastics Transition Index includes companies from the parent universe that provide technologies (“circular technologies”) and/or those that help enable the transition to a circular economy (“circular transition”), as defined using the following measures: Plastic Alternatives, Plastic End-of-life Solutions and Packaging Material & Waste. The Index also applies exclusions criteria to screen companies that are not considered aligned with the overall objective of plastic waste issue or promoting circularity. Additionally, the Index utilizes a combination of weighting strategies at both security and component levels, as well as applies issuer capping.

The MSCI ACWI IMI Plastics Transition Index is reviewed on a semi-annual basis, as of the close of the last business day of May and November, coinciding with the May and November Semi-Annual Index Reviews of the Parent Index. The Index is also reviewed on a quarterly basis to exclude existing constituents in the ESG Filtered Universe that do not meet the exclusions criteria.

FACTOR BOX AND FaCS METHODOLOGY

MSCI FaCS is a standard method ([MSCI FaCS Methodology](#)) for evaluating and reporting the Factor characteristics of equity portfolios. MSCI FaCS consists of Factor Groups (e.g. Value, Size, Momentum, Quality, Yield, and Volatility) that have been extensively documented in academic literature and validated by MSCI Research as key drivers of risk and return in equity portfolios. These Factor Groups are constructed by aggregating 16 factors (e.g. Book-to-Price, Earnings/Dividend Yields, LT Reversal, Leverage, Earnings Variability/Quality, Beta) from the latest Barra global equity factor risk model, GEMLT, designed to make fund comparisons transparent and intuitive for use. The MSCI Factor Box, which is powered by MSCI FaCS, provides a visualization designed to easily compare absolute exposures of funds/indexes and their benchmarks along 6 Factor Groups that have historically demonstrated excess market returns over the long run.

ABOUT MSCI

MSCI is a leading provider of critical decision support tools and services for the global investment community. With over 45 years of expertise in research, data and technology, we power better investment decisions by enabling clients to understand and analyze key drivers of risk and return and confidently build more effective portfolios. We create industry-leading research-enhanced solutions that clients use to gain insight into and improve transparency across the investment process. To learn more, please visit www.msci.com.
