INDEX METHODOLOGY

The Parent Index constituents are weighted according to their free float adjusted market capitalizations applicable to foreign investors. In addition, at each Index Review the largest weight will be capped at 34% (35% less 2.85714% buffer) in the Index. All other issuers' weights will be capped at 19% (20% less 5% buffer) of the total index weight. The index is also rebalanced on an "as needed" basis, at the end of any day on which the constraints as specified above (without the buffer) are breached. Such "as needed" rebalancings ensure that the index remains within the specified weight limits.
