

# MSCI USA Value Screened Index (EUR)

The MSCI USA Value Screened Index Captures Large and Mid cap US securities exhibiting overall value style characteristics. The value investment style characteristics for index construction are defined using three variables: book value to price, 12-month forward earnings to price and dividend yield. The index excludes companies from the parent index that are associated with controversial, civilian and nuclear weapons and tobacco, palm oil and arctic oil & gas or that derive revenues from thermal coal and oil sands extraction and that are not compliant with the United Nations Global Compact principles. The index also excludes companies that are involved in very severe controversies and/or in certain biodiversity related controversies and targets a minimum 30% reduction in carbon emission intensity relative to the underlying parent index.
