

MSCI World Mid Cap Equal Weighted Index (USD)

The **MSCI World Mid Cap Equal Weighted Index** represents an alternative weighting scheme to its market cap weighted parent index, the MSCI World Index. The index includes the same constituents as its parent (mid cap securities across 23 Developed Markets (DM) countries*). However, at each semi-annual rebalance date, all index constituents are weighted equally, effectively removing the influence of each constituents current price (high or low). Between rebalances, index constituent weightings will fluctuate due to price performance.

For a complete description of the index methodology, please see [Index methodology - MSCI](#).
