

MSCI World Thematic Rotation Factor Selection Index (USD)

The MSCI World Thematic Rotation Factor Selection Index is designed to represent the performance of a strategy that seeks higher exposure to three style factors -Momentum, Growth and Quality - while seeking to minimize risk for a given set of constraints. The Index selects securities from the MSCI World Index which belong, each month, to the four highest ranked MSCI Thematic Indexes, as selected from a set of MSCI Thematic Indexes. The selection is based on theme specific media sentiment score (MediaStats Megatrend Scores) calculated for each of the respective themes by MKT MediaStats¹.

For a complete description of the index methodology, please see [Index methodology - MSCI](#).

¹MKT MediaStats is a big-data information technology company specializing in financial markets which generates theme level Megatrend Scores on a monthly basis <https://www.mktmediastats.com/>.

The MSCI World Thematic Rotation Factor Selection Index was launched on Aug 07, 2024. Data prior to the launch date is back-tested test (i.e. calculations of how the index might have performed over that time period had the index existed). There are frequently material differences between back-tested performance and actual results. Past performance – whether actual or back-tested – is no indication or guarantee of future performance.

ABOUT MSCI

MSCI is a leading provider of critical decision support tools and services for the global investment community. With over 50 years of expertise in research, data and technology, we power better investment decisions by enabling clients to understand and analyze key drivers of risk and return and confidently build more effective portfolios. We create industry-leading research-enhanced solutions that clients use to gain insight into and improve transparency across the investment process. To learn more, please visit www.msci.com.
