

# MSCI USA Factor Mix A-Series Capped Index (USD)

The MSCI USA Factor Mix A-Series Capped Index represents the performance of large- and mid-cap companies across United States equity markets. It aims to represent the performance of quality, value and low volatility factor strategies. The Index is an equal weighted combination of the MSCI USA Value Weighted, MSCI USA Minimum Volatility and MSCI USA Quality Indexes in a single multi-factor index. The MSCI A-Series capped index methodology is designed to take into account the minimum number of stock guidelines for ETFs listed in the U.S. for non-U.S. equity indexes and the 25% and 50% concentration constraints required for a fund to qualify as a regulated investment company (RIC) in the U.S.

## CUMULATIVE INDEX PERFORMANCE – GROSS RETURNS (USD) (AUG 2005 – AUG 2020)

## ANNUAL PERFORMANCE (%)

Year	MSCI USA Factor Mix A-Series Capped	MSCI USA
2019	32.64	31.64
2018	-3.07	-4.50
2017	21.44	21.90
2016	11.88	11.61
2015	3.41	1.32
2014	13.58	13.36
2013	31.26	32.61
2012	14.22	16.13
2011	7.32	1.99
2010	14.88	15.45
2009	26.45	27.14
2008	-32.28	-37.14
2007	5.74	6.03
2006	14.20	15.32

The MSCI USA Factor Mix A-Series Capped Index was launched on Dec 12, 2014. Data prior to the launch date is back-tested data (i.e. calculations of how the index might have performed over that time period had the index existed). There are frequently material differences between back-tested performance and actual results. Past performance – whether actual or back-tested – is no indication or guarantee of future performance.

- Energy 2.18%

## INDEX METHODOLOGY

MSCI Factor Mix A-Series Indexes are constructed as the combination of three MSCI Factor Indexes: MSCI Quality Index, MSCI Value Weighted Index and MSCI Minimum Volatility Index. Each component index in the MSCI Factor Mix A-Series Index is attributed equal weight (1/3) at each rebalancing. For certain markets where it may not be possible to construct the MSCI Minimum Volatility Index due to the concentrated nature of the market, MSCI will replace the MSCI Minimum Volatility Index with the MSCI Risk Weighted Index in the construction of the MSCI Factor Mix A-Series Index. The MSCI Factor Mix A-Series Capped Index is designed by applying the MSCI A-Series Capped Index [methodology](#) to the standard MSCI Factor Mix A-Series Index. The MSCI A-Series capped methodology aims to produce a resulting index that targets inclusion of 25 stocks and applies the MSCI 25/50 Index Methodology, i.e., no issuer has a weight above 25%, and the sum of weights of all issuers with weights above 5% does not exceed 50%. To do so, the A-Series methodology includes constituents of the MSCI Small Cap Index in cases where the MSCI Standard Index has less than 25 securities.

## FACTOR BOX AND FaCS METHODOLOGY

MSCI FaCS is a standard method ([MSCI FaCS Methodology](#)) for evaluating and reporting the Factor characteristics of equity portfolios. MSCI FaCS consists of Factor Groups (e.g. Value, Size, Momentum, Quality, Yield, and Volatility) that have been extensively documented in academic literature and validated by MSCI Research as key drivers of risk and return in equity portfolios. These Factor Groups are constructed by aggregating 16 factors (e.g. Book-to-Price, Earnings/Dividend Yields, LT Reversal, Leverage, Earnings Variability/Quality, Beta) from the latest Barra global equity factor risk model, GEMLT, designed to make fund comparisons transparent and intuitive for use. The MSCI Factor Box, which is powered by MSCI FaCS, provides a visualization designed to easily compare absolute exposures of funds/indexes and their benchmarks along 6 Factor Groups that have historically demonstrated excess market returns over the long run.

## ABOUT MSCI

MSCI is a leading provider of critical decision support tools and services for the global investment community. With over 45 years of expertise in research, data and technology, we power better investment decisions by enabling clients to understand and analyze key drivers of risk and return and confidently build more effective portfolios. We create industry-leading research-enhanced solutions that clients use to gain insight into and improve transparency across the investment process.
