1 Introduction

The MSCI Voting Rights-Adjusted Indexes (“Indexes”) specifically include voting rights in the weighting criteria and construction methodology. These indexes have been developed for use by institutional investors seeking equity benchmarks adjusted to reflect voting rights in addition to standard criteria such as size, liquidity and free float.

The MSCI Voting Rights-Adjusted Indexes aim to better align constituent weights with economic rights and voting power, while continuing to represent the performance of a broad opportunity set. With this intent, the Indexes are designed to adjust the weights of unequal voting structures to reflect differential voting power, in addition to the use of free float market capitalization.

The Indexes are based on the MSCI Global Investable Market Indexes (“Parent Indexes”) and are currently available for the Standard size-segment in Developed and Emerging Markets. The methodology book for the MSCI Global Investable Market Indexes is available at:
<https://www.msci.com/index/methodology/latest/GIMI>.¹

¹ The Indexes are governed by a set of methodology and policy documents (“Methodology Set”), including the present index methodology document. The Methodology Set for the Indexes can be accessed from MSCI’s webpage <https://www.msci.com/index-methodology> in the section ‘Search Methodology by Index Name or Index Code’.

2 Constructing the MSCI Voting Rights-Adjusted Indexes

2.1 Eligible Universe

The eligible universe for the MSCI Voting Rights-Adjusted Indexes is defined by the constituents of the Parent Indexes.

2.2 Weighting Criteria

The Indexes incorporate voting rights to determine the weight of securities in the eligible universe.

The calculation of the MSCI Voting Rights-Adjusted Indexes is identical to the calculation of the Parent Indexes except that the MSCI Voting Rights-Adjusted Indexes use the Vote-Adjusted Foreign Inclusion Factor (VFIF) in the calculation of the index market capitalization, while the Parent Indexes use the Foreign Inclusion Factor (FIF)².

The VFIF is calculated for each security in the eligible universe. The VFIF considers both the free float and the voting power. The security's VFIF is lower than the security's FIF in the case of "unequal voting structures", defined as companies that provide less voting power than economic rights to their free float shareholders. Conversely, if the free float shareholders have voting power equal to or greater than the economic rights, the security's VFIF is equal to the security's FIF.

The calculated value for the security's VFIF is equal to zero for securities of companies that do not provide any voting rights to their free float shareholders. This results in the exclusion of such securities from the Indexes.

The calculation details are provided below.

2.2.1 Calculation Formulae

Vote-Adjusted Foreign Inclusion Factor (VFIF)

The security's Vote-Adjusted Foreign Inclusion Factor (VFIF) is calculated as follows:

$$VFIF = MIN [(Float * VAF), FOL] * Foreign Room Adj. Factor * Liquidity Adj. Factor$$

Where:

- *Float* = security's free float³, rounded as follows:
 - For securities with free float greater than 15%, the rounded free float is equal to the estimated free float, rounded up to the closest 5%

² For the definition of FIF, please refer to section 2.2.6 of the MSCI Global Investable Market Indexes methodology book. For details on the calculation of the index market capitalization, please refer to section 1.1.1 of the MSCI Index Calculation methodology book.

³ For the definition of free float and the calculation of Foreign Ownership Limits, please refer to Appendix V of the MSCI Global Investable Market Indexes methodology book.

- For securities with free float less than 15%, the rounded free float is equal to the estimated free float, rounded to the closest 1%
- VAF = Voting Adjustment Factor for the security's issuer (see formula below)
- FOL = security's Foreign Ownership Limit²
- *Foreign Room Adj. Factor* = adjustment factor applied to the security in the Parent Index due to low foreign room
- *Liquidity Adj. Factor* = Liquidity Adjustment Factor applied to the security in the Parent Index

Voting Adjustment Factor

The Voting Adjustment Factor (VAF) is calculated at an issuer level and is applicable to all the securities of the issuer.

The issuer's VAF is calculated as follows:

$$VAF = \text{MIN}\left(\frac{\text{Company Free Float Voting Power}}{\text{Company Free Float}}, 1\right)$$

The Company Free Float Voting Power is the proportion of the issuer's voting rights held by the free float shareholders and is calculated as follows:

$$\begin{aligned} \text{Company Free Float Voting Power} \\ = \frac{\sum NOS_i * \text{Float}_i * \text{Votes per Share}_i * V\text{Restr Items}_i * V\text{Restr Directors}_i * V\text{Restr Foreigners}_i}{\sum NOS_i * \text{Votes per Share}_i * V\text{Restr Items}_i * V\text{Restr Directors}_i} \end{aligned}$$

The Company Free Float is the proportion of the issuer's share capital held by the free float shareholders and is calculated as follows:

$$\text{Company Free Float} = \frac{\sum NOS_i * \text{Float}_i * \text{Median Price}_i}{\sum NOS_i * \text{Median Price}_i}$$

Where:

- i = security i of the issuer. The following securities are considered in the calculations:
 - All securities in the MSCI Equity Universe, as defined in the MSCI Global Investable Market Indexes methodology
 - All securities that have only voting rights but no economic rights (i.e., no rights to receive dividends or liquidation proceeds)
- NOS_i = number of shares of security i

- $Float_i$ = free float of security i (see details under the VFIF formula)
- $Votes\ per\ Share_i$ = number of votes per share of security i
 - If the voting rights are adjusted upon occurrence of a specific event, MSCI uses the number of votes under the scenario that the event does not occur⁴
- $VRestr\ Items_i$ = voting restrictions factor on agenda items for security i
 - Equals to 0 in the following scenarios, otherwise equals to 1:
 - (applies to all agenda items except for the election of Directors): Shareholders of security i are restricted from voting on agenda items that can be voted on by shareholders of other securities of the issuer
 - (applies only to the election of Directors): Shareholders of security i do not have the right to elect any Directors
- $VRestr\ Directors_i$ = voting restrictions factor on the election of Directors for security i
 - Equals to 0 in the following scenarios, otherwise equals to 1:
 - Shareholders of security i have the exclusive right to elect certain Directors but cannot vote on the election of other Directors, and the proportion of Directors that they can elect is lower than the minimum of the voting power and percentage economic rights of security i ⁵
 - Shareholders of security i have the right to elect certain Directors only, while other securities of the issuer have the right to elect all Directors⁶
- $VRestr\ Foreigners_i$ = voting restrictions factor on foreign investors for security i
 - Equals to 0 if the company restricts all foreign shareholders of security i from voting, otherwise equals to 1⁷
- $Median\ Price_i$ = median of the closing prices in USD for security i in the past 3 months
 - Only the days during which all the issuer's listed securities had trading volume greater than zero are used in the calculation
 - If there are less than 5 of these days during the 3 months period, then the median price calculation is performed using the past 6 months period. If there are less than 5 of these days during the 6 months period, then the median price calculation is performed using the past 12 months period⁸

⁴ Examples:

- The votes per share equals to 0 if shareholders get voting rights only if they are not paid any dividends
- The votes per share applicable to a new shareholder is used if shareholders get increased voting rights after holding their shares during a given period

⁵ See Appendix 1 for details on the calculation of security voting power and security percentage economic rights.

⁶ This restriction may be ignored if the voting power of security i on the election of Directors is specifically increased to compensate for the security's otherwise low voting rights.

⁷ Voting restrictions on foreign investors that are driven by regulation are not considered.

⁸ If there is no day during which all the issuer's listed securities had trading volume greater than zero during the past 12 months period, then the price as of the last day during which all the issuer's listed securities had trading volume greater than zero is used.

- For unlisted securities, the closing prices in USD are determined as the closing prices in USD of the reference listed security times the unlisted conversion factor
- In case a security was subject to Price Adjustment Factor(s) (PAF) due to a corporate event during the calculation period, the prices are adjusted accordingly so they remain comparable throughout the period

The issuer VAF calculation does not take into account the existence of special purpose non-voting instruments (e.g., Non-Voting Depositary Receipts (NVDRs) in Thailand and CPOs in Mexico) issued in the context of regulatory restrictions on foreign investors' voting rights.

3 Maintaining the MSCI Voting Rights-Adjusted Indexes

3.1 Index Reviews

The MSCI Voting Rights-Adjusted Indexes are reviewed to coincide with the regular Index Reviews of the Parent Indexes. The changes are implemented as of the close of the last business day of February, May, August and November.

The pro forma Indexes are generally announced nine business days before the index review effective date.

3.1.1 Semi-Annual Index Reviews

During the Index Reviews, the MSCI Voting Rights-Adjusted Indexes are fully reviewed to reflect all changes in the Parent Indexes – including additions, deletions and updates to the relevant security attributes used in the calculation of the security Vote-Adjusted Foreign Inclusion Factors (VFIFs).

In addition, the factors specific to the MSCI Voting Rights-Adjusted Indexes are reviewed for all securities of issuers included in the pro forma Parent Index:

- Votes per share
- Voting restrictions factor on agenda items
- Voting restrictions factor on the election of Directors
- Voting restrictions factor on foreign investors
- Median price

For such factors, the data cutoff dates are as follows:

- Votes per share and voting restrictions factors: Equity Universe Cutoff Date of the Parent Indexes
- Median price: Price Cutoff Date of the Parent Indexes

The votes per share and voting restrictions factors are fully reviewed and updated as of the Price Cutoff Date for issuers that have securities added to the Parent Index as part of the Index Review.

The votes per share and voting restrictions factors information is primarily sourced from the company's annual reports and accounts. Additionally, MSCI may use other sources such as proxy statement, Articles of Association and Corporate Governance report.

3.1.2 Quarterly Index Reviews

During the Index Reviews, the MSCI Voting Rights-Adjusted Indexes are fully reviewed to reflect all changes in the Parent Indexes – including additions, deletions and updates to the relevant security attributes used in the calculation of the security Vote-Adjusted Foreign Inclusion Factors (VFIFs).

The Voting Adjustment Factor (VAF) generally remains unchanged as part of the Index Review except for:

- Issuers that have securities added to the Parent Index as part of the Index Review

- Issuers for which the set of securities used in the VAF calculation changes as part of the Index Review (i.e., issuers with securities newly used or no longer used in the VAF calculation)

The factors specific to the MSCI Voting Rights-Adjusted Indexes are reviewed for securities of these issuers to determine the VAF:

- Votes per share
- Voting restrictions factor on agenda items
- Voting restrictions factor on the election of Directors
- Voting restrictions factor on foreign investors
- Median price

For such factors, the data cutoff dates are as follows:

- Votes per share and voting restrictions factors: Equity Universe Cutoff Date of the Parent Indexes
- Median price: Price Cutoff Date of the Parent Indexes

The votes per share and voting restrictions factors are fully reviewed and updated as of the Price Cutoff Date for issuers that have securities added to the Parent Index as part of the Index Review.

The votes per share and voting restrictions factors information is primarily sourced from the company's annual reports and accounts. Additionally, MSCI may use other sources such as proxy statement, Articles of Association and Corporate Governance report.

3.2 Ongoing Event - Related Maintenance

The MSCI Corporate Events Methodology is applied for the maintenance of the MSCI Voting Rights-Adjusted Indexes between index reviews.

All changes implemented in the Parent Indexes due to corporate events are simultaneously reflected in the MSCI Voting Rights-Adjusted Indexes, including additions, deletions and updates to all relevant security attributes used in the calculation of the security Vote-Adjusted Foreign Inclusion Factors (VFIFs).

The Voting Adjustment Factor (VAF) generally remains unchanged at the time of the event except for the following corporate events:

- New additions to the Parent Indexes (i.e., IPOs and other early inclusions), including migrations;
- Corporate events leading to the creation or the deletion of a constituent share class (i.e., conversion, split/addition, acquisition with impact on voting structure⁹);
- Corporate events leading to more than 50% increase in the full market capitalization of the company;

⁹ "Voting structure" is defined as the universe of securities of an issuer used in the calculation of the VAF and the securities' votes per share and voting restriction factors.

- Spin off cases where the spun off company has a voting structure⁷ which is different from the one of the parent company.

For corporate events leading to the addition of a new security to the Parent Indexes at the time of the event, but not meeting the abovementioned criteria, the Voting Adjustment Factor (VAF) of the new security will be:

- Equal to the VAF of the spinning off entity, in case of spin off cases where the voting structure⁷ of the spun off company is equal to the one of the spinning off company;

Equal to the VAF of the linked security in case of merger and acquisitions.

Appendix I: Additional Calculations on Voting Restrictions

As per section 2.2.1, the voting restrictions factor on the election of Directors for security i ($V_{Restr Directors_i}$) equals to 0 if shareholders of security i have the exclusive right to elect certain Directors but cannot vote on the election of other Directors, and the proportion of Directors that they can elect is lower than the minimum of the voting power and percentage economic rights of security i .

The security voting power is calculated as follows:

$$Security\ Voting\ Power = \frac{NOS * Votes\ per\ Share}{\sum NOS_i * Votes\ per\ Share_i}$$

The security percentage economic rights is calculated as follows:

$$Security\ Economic\ Rights\ (\%) = \frac{NOS * Median\ Price}{\sum NOS_i * Median\ Price_i}$$

Where:

- i = security i of the issuer (see section 2.2.1 for details)
- NOS , $Votes\ per\ Share$ and $Median\ Price$ are defined in section 2.2.1

Appendix II: Changes to this Document

The following sections have been modified since March 2019:

Section 2.2.1: Calculation Formulae

- Clarified the rules for the Median Price calculation

The following sections have been modified as of November 2023:

- Methodology book was updated to reflect the transition of the MSCI Global Investable Market Indexes (GIMI) to Quarterly Comprehensive Index Reviews.
- All references to “Semi-Annual Index Reviews” and “Quarterly Index Reviews” of the MSCI GIMI were replaced with “Index Reviews.”
- Section 1: Introduction
- Added footnote on Methodology Set.
- Added Appendix II; Changes to this Document.

About MSCI

MSCI is a leading provider of critical decision support tools and services for the global investment community. With over 50 years of expertise in research, data and technology, we power better investment decisions by enabling clients to understand and analyze key drivers of risk and return and confidently build more effective portfolios. We create industry-leading research-enhanced solutions that clients use to gain insight into and improve transparency across the investment process.

To learn more, please visit www.msci.com.

The process for submitting a formal index complaint can be found on the index regulation page of MSCI's website at:
<https://www.msci.com/index-regulation>.

Notice and disclaimer

This document and all of the information contained in it, including without limitation all text, data, graphs, charts (collectively, the "Information") is the property of MSCI Inc. or its subsidiaries (collectively, "MSCI"), or MSCI's licensors, direct or indirect suppliers or any third party involved in making or compiling any Information (collectively, with MSCI, the "Information Providers") and is provided for informational purposes only. The Information may not be modified, reverse-engineered, reproduced or disseminated in whole or in part without prior written permission from MSCI. All rights in the Information are reserved by MSCI and/or its Information Providers.

The Information may not be used to create derivative works or to verify or correct other data or information. For example (but without limitation), the Information may not be used to create indexes, databases, risk models, analytics, software, or in connection with the issuing, offering, sponsoring, managing or marketing of any securities, portfolios, financial products or other investment vehicles utilizing or based on, linked to, tracking or otherwise derived from the Information or any other MSCI data, information, products or services.

The user of the Information assumes the entire risk of any use it may make or permit to be made of the Information. NONE OF THE INFORMATION PROVIDERS MAKES ANY EXPRESS OR IMPLIED WARRANTIES OR REPRESENTATIONS WITH RESPECT TO THE INFORMATION (OR THE RESULTS TO BE OBTAINED BY THE USE THEREOF), AND TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, EACH INFORMATION PROVIDER EXPRESSLY DISCLAIMS ALL IMPLIED WARRANTIES (INCLUDING, WITHOUT LIMITATION, ANY IMPLIED WARRANTIES OF ORIGINALITY, ACCURACY, TIMELINESS, NON-INFRINGEMENT, COMPLETENESS, MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE) WITH RESPECT TO ANY OF THE INFORMATION.

Without limiting any of the foregoing and to the maximum extent permitted by applicable law, in no event shall any Information Provider have any liability regarding any of the Information for any direct, indirect, special, punitive, consequential (including lost profits) or any other damages even if notified of the possibility of such damages. The foregoing shall not exclude or limit any liability that may not by applicable law be excluded or limited, including without limitation (as applicable), any liability for death or personal injury to the extent that such injury results from the negligence or willful default of itself, its servants, agents or sub-contractors.

Information containing any historical information, data or analysis should not be taken as an indication or guarantee of any future performance, analysis, forecast or prediction. Past performance does not guarantee future results.

The Information may include "Signals," defined as quantitative attributes or the product of methods or formulas that describe or are derived from calculations using historical data. Neither these Signals nor any description of historical data are intended to provide investment advice or a recommendation to make (or refrain from making) any investment decision or asset allocation and should not be relied upon as such. Signals are inherently backward-looking because of their use of historical data, and they are not intended to predict the future. The relevance, correlations and accuracy of Signals frequently will change materially.

The Information should not be relied on and is not a substitute for the skill, judgment and experience of the user, its management, employees, advisors and/or clients when making investment and other business decisions. All Information is impersonal and not tailored to the needs of any person, entity or group of persons.

None of the Information constitutes an offer to sell (or a solicitation of an offer to buy), any security, financial product or other investment vehicle or any trading strategy.

It is not possible to invest directly in an index. Exposure to an asset class or trading strategy or other category represented by an index is only available through third party investable instruments (if any) based on that index. MSCI does not issue, sponsor, endorse, market, offer, review or otherwise express any opinion regarding any fund, ETF, derivative or other security, investment, financial product or trading strategy that is based on, linked to or seeks to provide an investment return related to the performance of any MSCI index (collectively, "Index Linked Investments"). MSCI makes no assurance that any Index Linked Investments will accurately track index performance or provide positive investment returns. MSCI Inc. is not an investment adviser or fiduciary and MSCI makes no representation regarding the advisability of investing in any Index Linked Investments.

Index returns do not represent the results of actual trading of investible assets/securities. MSCI maintains and calculates indexes, but does not manage actual assets. The calculation of indexes and index returns may deviate from the stated methodology. Index returns do not reflect payment of any sales charges or fees an investor may pay to purchase the securities underlying the index or Index Linked Investments. The imposition of these fees and charges would cause the performance of an Index Linked Investment to be different than the MSCI index performance.

The Information may contain back tested data. Back-tested performance is not actual performance, but is hypothetical. There are frequently material differences between back tested performance results and actual results subsequently achieved by any investment strategy.

Constituents of MSCI equity indexes are listed companies, which are included in or excluded from the indexes according to the application of the relevant index methodologies. Accordingly, constituents in MSCI equity indexes may include MSCI Inc., clients of MSCI or suppliers to MSCI. Inclusion of a security within an MSCI index is not a recommendation by MSCI to buy, sell, or hold such security, nor is it considered to be investment advice.

Data and information produced by various affiliates of MSCI Inc., including MSCI ESG Research LLC and Barra LLC, may be used in calculating certain MSCI indexes. More information can be found in the relevant index methodologies on www.msci.com.

MSCI receives compensation in connection with licensing its indexes to third parties. MSCI Inc.'s revenue includes fees based on assets in Index Linked Investments. Information can be found in MSCI Inc.'s company filings on the Investor Relations section of msci.com.

MSCI ESG Research LLC is a Registered Investment Adviser under the Investment Advisers Act of 1940 and a subsidiary of MSCI Inc. Neither MSCI nor any of its products or services recommends, endorses, approves or otherwise expresses any opinion regarding any issuer, securities, financial products or instruments or trading strategies and MSCI's products or services are not a recommendation to make (or refrain from making) any kind of investment decision and may not be relied on as such, provided that applicable products or services from MSCI ESG Research may constitute investment advice. MSCI ESG Research materials, including materials utilized in any MSCI ESG Indexes or other products, have not been submitted to, nor received approval from, the United States Securities and Exchange Commission or any other regulatory body. MSCI ESG and climate ratings, research and data are produced by MSCI ESG Research LLC, a subsidiary of MSCI Inc. MSCI ESG Indexes, Analytics and Real Estate are products of MSCI Inc. that utilize information from MSCI ESG Research LLC. MSCI Indexes are administered by MSCI Limited (UK).

Please note that the issuers mentioned in MSCI ESG Research materials sometimes have commercial relationships with MSCI ESG Research and/or MSCI Inc. (collectively, "MSCI") and that these relationships create potential conflicts of interest. In some cases, the issuers or their affiliates purchase research or other products or services from one or more MSCI affiliates. In other cases, MSCI ESG Research rates financial products such as mutual funds or ETFs that are managed by MSCI's clients or their affiliates, or are based on MSCI Inc. Indexes. In addition, constituents in MSCI Inc. equity indexes include companies that subscribe to MSCI products or services. In some cases, MSCI clients pay fees based in whole or part on the assets they manage. MSCI ESG Research has taken a number of steps to mitigate potential conflicts of interest and safeguard the integrity and independence of its research and ratings. More information about these conflict mitigation measures is available in our Form ADV, available at <https://adviserinfo.sec.gov/firm/summary/169222>.

Any use of or access to products, services or information of MSCI requires a license from MSCI. MSCI, Barra, RiskMetrics, IPD and other MSCI brands and product names are the trademarks, service marks, or registered trademarks of MSCI or its subsidiaries in the United States and other jurisdictions. The Global Industry Classification Standard (GICS) was developed by and is the exclusive property of MSCI and S&P Global Market Intelligence. "Global Industry Classification Standard (GICS)" is a service mark of MSCI and S&P Global Market Intelligence.

MIFID2/MIFIR notice: MSCI ESG Research LLC does not distribute or act as an intermediary for financial instruments or structured deposits, nor does it deal on its own account, provide execution services for others or manage client accounts. No MSCI ESG Research product or service supports, promotes or is intended to support or promote any such activity. MSCI ESG Research is an independent provider of ESG data.

Privacy notice: For information about how MSCI collects and uses personal data, please refer to our Privacy Notice at <https://www.msci.com/privacy-pledge>.
