

# **Environment Agency Pension Fund Selects MSCI as Low Carbon Equity Index Provider**

**London – June 9 2015** MSCI Inc. (NYSE: MSCI), a leading provider of investment decision support tools worldwide, (EAPF), announced today that the UK based Environment Agency Pension Fund (EAPF) has selected the MSCI World Low Carbon Target Index as the benchmark for its global passive equities portfolio. EAPF's allocation to this portion of their portfolio is approximately £280m, constituting over 10% of the EAPF's reported assets, and its entire market capitalization-based global passive equities.

Mark Mansley, Chief Investment Officer at the EAPF said: "For us, climate change is an investment risk issue – so we wanted a benchmark which takes a risk-based approach, rather than simply excluding certain stocks. We engaged with the industry to find a solution and felt the MSCI understood the needs of institutional investors when they developed the Low Carbon Target approach."

Thomas Kuh, Head of MSCI ESG Indexes, said, "We are seeing the risk from climate change becoming a major issue for institutional investors, and MSCI is delighted that EAPF chose MSCI as its low carbon equity index provider. Their selection of this benchmark illustrates their belief that MSCI's Low Carbon indexes can be an effective tool to measure and manage carbon exposure in their equity portfolio."

The EAPF is the founding investor in a new institutional pooled fund (MSCI World Low Carbon Target Index Fund) based on the index, which will be managed by Legal & General Investment Management Limited. This fund will be open to other UK pension fund investors. The MSCI Global Low Carbon Target Indexes aim to reflect a lower carbon exposure than that of the broad market by overweighting companies with low carbon emissions and those with low potential carbon emissions.

The Information should not be relied on and is not a substitute for the skill, judgment and experience of the user, its management, employees, advisors and/or clients when making investment and other business decisions. All Information is impersonal and not tailored to the needs of any person, entity or group of persons.

None of the Information constitutes an offer to sell (or a solicitation of an offer to buy), any security, financial product or other investment vehicle or any trading strategy.

It is not possible to invest directly in an index. Exposure to an asset class or trading strategy or other category represented by an index is only available through third party investable instruments (if any) based on that index. MSCI does not issue, sponsor, endorse, market, offer, review or otherwise express any opinion regarding any fund, ETF, derivative or other security, investment, financial product or trading strategy that is based on, linked to or seeks to provide an investment return related to the performance of any MSCI index (collectively, "Index Linked Investments"). MSCI makes no assurance that any Index Linked Investments will accurately track index performance or provide positive investment returns. MSCI Inc. is not an investment adviser or fiduciary and MSCI makes no representation regarding the advisability of investing in any Index Linked Investments.

Index returns do not represent the results of actual trading of investible assets/securities. MSCI maintains and calculates indexes, but does not manage actual assets. Index returns do not reflect payment of any sales charges or fees an investor may pay to purchase the securities underlying the index or Index Linked Investments. The imposition of these fees and charges would cause the performance of an Index Linked Investment to be different than the MSCI index performance.

The Information may contain back tested data. Back-tested performance is not actual performance, but is hypothetical. There are frequently material differences between back tested performance results and actual results subsequently achieved by any investment strategy.

Constituents of MSCI equity indexes are listed companies, which are included in or excluded from the indexes according to the application of the relevant index methodologies. Accordingly, constituents in MSCI equity indexes may include MSCI Inc., clients of MSCI or suppliers to MSCI. Inclusion of a security within an MSCI index is not a recommendation by MSCI to buy, sell, or hold such security, nor is it considered to be investment advice.

Data and information produced by various affiliates of MSCI Inc., including MSCI ESG Research Inc. and Barra LLC, may be used in calculating certain MSCI equity indexes. More information can be found in the relevant standard equity index methodologies on www.msci.com.

MSCI receives compensation in connection with licensing its indexes to third parties. MSCI Inc.'s revenue includes fees based on assets in investment products linked to MSCI equity indexes. Information can be found in MSCI's company filings on the Investor Relations section of www.msci.com
