

MSCI OVERSEAS CHINA SMALL CAP INDEX (USD)

The MSCI Overseas China Small Cap Index captures small cap representation across all China securities (including ADRs) listed on the NYSE Euronext (New York), the NASDAQ, the New York AMEX and the Singapore exchanges. When combined with the MSCI China and MSCI China A Indexes, the index provides investors with an expanded investable universe of China companies.

³ Based on ICE LIBOR 1M

The MSCI Overseas China Small Cap Index was launched on Sep 07, 2011. Data prior to the launch date is back-tested data (i.e. calculations of how the index might have performed over that time period had the index existed). There are frequently material differences between back-tested performance and actual results. Past performance -- whether actual or back-tested -- is no indication or guarantee of future performance.

INDEX METHODOLOGY

The **MSCI Overseas China Indexes** are standalone indexes designed to capture the investment opportunity set of China equity securities listed outside the Greater China region--specifically China equities listed in the USA and Singapore. The indexes employ similar size and liquidity requirements to the MSCI China Indexes that are constructed under the MSCI Global Investable Market Indexes (GIMI) methodology. In addition, the MSCI Overseas China Indexes exclude companies formed through reverse merger and on the SGX Watch List. The MSCI Overseas China Indexes are reconstituted annually and reviewed on a quarterly basis for size migration. At each quarterly rebalancing, buffer rules are applied to help maintain index stability and minimize turnover."

FACTOR BOX AND FaCS METHODOLOGY

MSCI FaCS is a standard method ([MSCI FaCS Methodology](#)) for evaluating and reporting the Factor characteristics of equity portfolios. MSCI FaCS consists of Factor Groups (e.g. Value, Size, Momentum, Quality, Yield, and Volatility) that have been extensively documented in academic literature and validated by MSCI Research as key drivers of risk and return in equity portfolios. These Factor Groups are constructed by aggregating 16 factors (e.g. Book-to-Price, Earnings/Dividend Yields, LT Reversal, Leverage, Earnings Variability/Quality, Beta) from the latest Barra global equity factor risk model, GEMLT, designed to make fund comparisons transparent and intuitive for use. The MSCI Factor Box, which is powered by MSCI FaCS, provides a visualization designed to easily compare absolute exposures of funds/indexes and their benchmarks along 6 Factor Groups that have historically demonstrated excess market returns over the long run.

ABOUT MSCI

For more than 40 years, MSCI' research-based indexes and analytics have helped the world' leading investors build and manage better portfolios. Clients rely on our offerings for deeper insights into the drivers of performance and risk in their portfolios, broad asset class coverage and innovative research. Our line of products and services includes indexes, analytical models, data, real estate benchmarks and ESG research. MSCI serves 99 of the top 100 largest money managers, according to the most recent P&I ranking. For more information, visit us at www.msci.com.
