

MSCI EMU Universal Select Business Screen Index (EUR)

The MSCI EMU Universal Select Business Screens Index is based on the MSCI EMU Index, its parent index, and includes large and mid-cap securities across 10 Developed Markets (DM) countries* in EMU. The index aims to represent the performance of a strategy that excludes companies that are associated with controversial weapons, nuclear weapons or oil sands or recreational cannabis; or derive revenues from conventional weapons, thermal coal or tobacco or civilian firearms; or are involved in very severe controversies pertaining to ESG issues; or have an MSCI ESG Rating of CCC. The strategy also aims to increase exposure to companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile, by re-weighting free-float adjusted market capitalization weights based on certain ESG metrics.

For a complete description of the index methodology, please see [Index methodology - MSCI](#).
