

# MSCI ACWI ex Fossil Fuels Custom ESG Focus Index (USD)

The MSCI ACWI ex Fossil Fuels Custom ESG Focus Index is based on MSCI ACWI Index, its parent index, which includes large and mid-cap stocks across 23 Developed Market (DM) and 24 Emerging Market (EM) countries\*. The Index is designed to maximize exposure to positive environmental, social and governance (ESG) factors while exhibiting risk and return characteristics similar to those of the MSCI ACWI Index. The index represents the performance of the broad market while excluding companies that own oil, gas and coal reserves. It is a benchmark for investors who aim to eliminate fossil fuel reserves exposure from their investments due to concerns about the contribution of these reserves to climate change. The index is constructed by selecting constituents from MSCI ACWI Index through an optimization process that aims to maximize exposure to ESG factors for a target tracking error budget under certain constraints. The index is sector-diversified and targets companies with high ESG ratings in each sector.

For a complete description of the index methodology, please see [Index methodology - MSCI](#).
