

MSCI World Select Multiple Factor ESG Low Carbon Target Index (GBP)

The MSCI World Select Multiple Factor ESG Low Carbon Target Index is based on the MSCI World Index, its Parent Index, and includes large and mid-cap securities across 23 Developed Markets (DM)* countries. The index is designed to represent the performance of a factor investing strategy that seeks systematic integration of environmental, social and governance (ESG) norms and two dimensions of carbon exposure (carbon emissions and fossil fuel reserves), by seeking higher exposure to a combination of style factors along with improvement in the ESG profile and reduction in carbon exposure of the Index.

For a complete description of the index methodology, please see [Index methodology - MSCI](#).

The MSCI World Select Multiple Factor ESG Low Carbon Target Index was launched on Jan 04, 2019. Data prior to the launch date is back-tested test (i.e. calculations of how the index might have performed over that time period had the index existed). There are frequently material differences between back-tested performance and actual results. Past performance – whether actual or back-tested – is no indication or guarantee of future performance.

ABOUT MSCI

MSCI is a leading provider of critical decision support tools and services for the global investment community. With over 50 years of expertise in research, data and technology, we power better investment decisions by enabling clients to understand and analyze key drivers of risk and return and confidently build more effective portfolios. We create industry-leading research-enhanced solutions that clients use to gain insight into and improve transparency across the investment process. To learn more, please visit www.msci.com.
