

MSCI World ESG Screened 5% Risk Control Index (USD)

The MSCI World ESG Screened 5% Risk Control Index is based on the MSCI World Screened Index, its parent index, and includes large and mid-cap segments across 23 Developed Markets (DM) countries* in the world. The index excludes companies from the parent index that are associated with controversial, civilian and nuclear weapons and tobacco, that derive revenues from thermal coal and oil sands extraction and that are not compliant with the United Nations Global Compact principles. The index aims to represent the performance of an investment strategy that targets a specific level of risk by varying the weights of the MSCI World Screened Index and a cash component.

For a complete description of the index methodology, please see [Index methodology - MSCI](#).
