## 1. Introduction

The MSCI Digital Assets Reference Indexes (“the Indexes”) aim to represent the performance of an investment strategy in the underlying single digital assets<sup>1</sup>.

Each Index relates to a single digital asset and is constructed for resilience by blending multiple indexes that each seek to robustly represent the performance of the underlying digital asset computed over different daily pricing points.

---

<sup>1</sup> The Index is governed by a set of methodology and policy documents (“Methodology Set”), including the present index methodology document. The Methodology Set for the Indexes can be accessed from MSCI’s webpage <https://www.msci.com/index-methodology> in the section ‘Search Methodology by Index Name or Index Code’.

## 2. Constructing MSCI Digital Assets Reference Index

### 2.1 Applicable Universe

The Applicable Universe consists of a set of digital assets benchmarks (“Component Indexes”) for a single digital asset, published by an external data provider (“Component Index Administrator”)<sup>2</sup>. Each Component Index differs in terms of the choice of the pricing window and hence the timing of the pricing snaps used in the determination of the underlying daily index closing prices.

### 2.2 Weighting Scheme

The Index blends the Component Indexes<sup>3</sup> with a fixed weight on a daily basis.

### 2.3 Index Calculation

The Index daily price returns are calculated as the equal-weighted average of daily price returns in US Dollar (USD) of the Component Indexes.

The latest available daily index returns for each of the Component Indexes will be used for the calculation of the returns of the Index. The Index is calculated 5 days a week, from Monday to Friday, in price variant only as per the MSCI Index Calculation Methodology.<sup>4</sup>

---

<sup>2</sup> Please refer to Appendix I for details of the current Component Index Administrator and a description of the in-force Component Indexes.

<sup>3</sup> Component Indexes from the same Component Index Administrator are blended in the construction of the Index.

<sup>4</sup> MSCI Index Calculation Methodology is available at <https://www.msci.com/index-methodology>.

## 3. Maintaining MSCI Digital Assets Reference Indexes

### 3.1 Index Reviews

The Index is reviewed on a quarterly basis, as of the close of the last business day of February, May, August and November. The pro-forma index is generally announced five business days before the Index effective date. Between two successive index reviews, the weights assigned to Component Indexes are kept constant.

### 3.2 Ongoing Event-Related Maintenance

There will be no addition to the list of Component Indexes between two successive Index Reviews. If any Component Index is terminated<sup>5</sup> by the Component Index Administrator, it will be deleted from the Index on the day of termination with an advance notification of two days.

In case of the unavailability of a Component Index level used in the calculation of the Index for whatever reason, MSCI will carry forward the latest available component index level to calculate its indexes.

If fewer than two Component Index levels from the Component Index Administrator were available for more than five business days, then MSCI will calculate the Index based on a set of alternative Component Indexes (“Reserve Component Indexes”) as published by a second external data provider (“Reserve Component Index Administrator”<sup>6</sup>), with similar characteristics as those of the current Component Indexes<sup>7</sup>. Any such change will be reviewed by the MSCI Equity Index Committee (EIC) and an announcement would be sent to all clients with the relevant information and appropriate notice simultaneously.

If MSCI determines that other index levels are necessary to properly capture the index objective, for example, in, but not limited to, stressed market circumstances, persistent or repeated unavailability of full set of Component Indexes or if index levels from the Reserve Component Index Administrator were also unavailable, then an announcement would be sent simultaneously to all clients with the relevant information and appropriate notice of change. All such determinations are approved by the EIC.

All MSCI Digital Assets Reference Indexes are subject to the standard MSCI termination and consultation policies.<sup>8</sup>

<sup>5</sup> Termination of Component Indexes will be governed by the stated public methodologies of the individual Component Indexes. Relevant links are provided in Appendixes 1 and 2.

<sup>6</sup> See Appendix 2 for details on the Reserve Component Index Administrator.

<sup>7</sup> The Indexes will use the Reserve Component Indexes, when needed, starting January 1, 2024

<sup>8</sup> MSCI Index Policies are available at <https://www.msci.com/index-methodology> for details on MSCI’s index governance policies.

## Appendix 1 – Description of Component Indexes

Each Index is constructed by blending two or more Component Indexes representing the same digital asset. Component Indexes from a single Component Index Administrator differ only in the choice of pricing window.

### MSCI Bitcoin Reference Index

The MSCI Bitcoin Reference Index is a combination of following Component Indexes

- Compass Crypto Custom Reference Index Bitcoin 3pm-3:20pm London Time
- Compass Crypto Custom Reference Index Bitcoin 3:20pm-3:40pm London Time
- Compass Crypto Custom Reference Index Bitcoin 3:40pm-4:00pm London Time

At launch of the MSCI Bitcoin Reference Index, the calculation of the Index and its history is based upon the blend of the Bitcoin Compass Crypto Custom Reference Indexes<sup>9</sup>. These Component Indexes are governed by the same index methodology, but use different daily closing price definitions. Each Component Index is calculated for the three successive 20-minute intervals between 3 pm London time and 4 pm London time. The within-interval calculation is based on the 25<sup>th</sup>, 50<sup>th</sup> and 75<sup>th</sup> weighted price percentiles for resilience to outliers and price/volume distribution changes.

### MSCI Ethereum Reference Index

The MSCI Ethereum Reference Index is a combination of following Component Indexes

- Compass Crypto Custom Reference Index Ethereum 3pm-3:20pm London Time
- Compass Crypto Custom Reference Index Ethereum 3:20pm-3:40pm London Time
- Compass Crypto Custom Reference Index Ethereum 3:40pm-4:00pm London Time

At launch of the MSCI Ethereum Reference Index, the calculation of the index and its history was based upon the blend of the Ethereum Compass Crypto Custom Reference Indexes. These Component Indexes are governed by the same index methodology, but use different daily closing price definitions. Each Component Index is calculated for the three successive 20-minute intervals between 3 pm London time and 4 pm London time. The within-interval calculation is based on the 25<sup>th</sup>, 50<sup>th</sup> and 75<sup>th</sup> weighted price percentiles for resilience to outliers and price/volume distribution changes.

<sup>9</sup> Please refer to Section 3 of Compass Crypto Custom Reference Indices methodology for details on the index calculation and Section 4 for index governance, at [https://www.compassft.com/wp-content/uploads/CCCRI\\_Methodology.pdf](https://www.compassft.com/wp-content/uploads/CCCRI_Methodology.pdf)

The Benchmark Statement for the Compass Crypto Reference Indexes can be found at [https://www.compassft.com/wp-content/uploads/CCRI\\_Benchmark\\_Statement.pdf](https://www.compassft.com/wp-content/uploads/CCRI_Benchmark_Statement.pdf)

## Appendix 2 – Reserve Component Index Administrator

The fallback mechanism described in Section 3.2 requires data from a Reserve Component Index Administrator.

Starting January 1, 2024, the Indexes will use, when needed, Reserve Component Indexes supplied by CCData, a regulated benchmark administrator formerly known as CryptoCompare.<sup>10</sup>

In the event the fallback calculation is required, the corresponding Reserve Component Indexes provided by CCData will be used for the Index calculation:

### Bitcoin:

- CCData Bitcoin Reference Price 15:20 London Time Index
- CCData Bitcoin Reference Price 15:40 London Time Index
- CCData Bitcoin Reference Price 16:00 London Time Index

### Ethereum:

- CCData Ethereum Reference Price 15:20 London Time Index
- CCData Ethereum Reference Price 15:40 London Time Index
- CCData Ethereum Reference Price 16:00 London Time Index

CCData's proprietary index calculation is based on 24-hour volume-weighted average calculation, time-penalty factor, and outlier methodology. All index methodology and other reference documents may be found at <https://ccdata.io/indices/index-documentation>.

While the Reserve Component Indexes also aim to reflect the performance of the underlying digital asset computed over the respective daily pricing points, the Reserve Component Index methodologies remain proprietary and may differ from those applied by the Component Index Administrator including, but not limited to, the exact calculation methodology, the choice of reference trading platforms and the number/frequency/timing/calculation of pricing snaps used in the determination of the underlying daily closing prices.

<sup>10</sup> Effective from 1<sup>st</sup> January 2024. Further details about CCData may be found at <https://ccdata.io/>

### About MSCI

MSCI is a leading provider of critical decision support tools and services for the global investment community. With over 50 years of expertise in research, data and technology, we power better investment decisions by enabling clients to understand and analyze key drivers of risk and return and confidently build more effective portfolios. We create industry-leading research-enhanced solutions that clients use to gain insight into and improve transparency across the investment process.

To learn more, please visit [www.msci.com](https://www.msci.com).

The process for submitting a formal index complaint can be found on the index regulation page of MSCI's website at: <https://www.msci.com/index-regulation>.

## Notice and disclaimer

This document and all of the information contained in it, including without limitation all text, data, graphs, charts (collectively, the "Information") is the property of MSCI Inc. or its subsidiaries (collectively, "MSCI"), or MSCI's licensors, direct or indirect suppliers or any third party involved in making or compiling any Information (collectively, with MSCI, the "Information Providers") and is provided for informational purposes only. The Information may not be modified, reverse-engineered, reproduced or disseminated in whole or in part without prior written permission from MSCI. All rights in the Information are reserved by MSCI and/or its Information Providers.

The Information may not be used to create derivative works or to verify or correct other data or information. For example (but without limitation), the Information may not be used to create indexes, databases, risk models, analytics, software, or in connection with the issuing, offering, sponsoring, managing or marketing of any securities, portfolios, financial products or other investment vehicles utilizing or based on, linked to, tracking or otherwise derived from the Information or any other MSCI data, information, products or services.

The user of the Information assumes the entire risk of any use it may make or permit to be made of the Information. NONE OF THE INFORMATION PROVIDERS MAKES ANY EXPRESS OR IMPLIED WARRANTIES OR REPRESENTATIONS WITH RESPECT TO THE INFORMATION (OR THE RESULTS TO BE OBTAINED BY THE USE THEREOF), AND TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, EACH INFORMATION PROVIDER EXPRESSLY DISCLAIMS ALL IMPLIED WARRANTIES (INCLUDING, WITHOUT LIMITATION, ANY IMPLIED WARRANTIES OF ORIGINALITY, ACCURACY, TIMELINESS, NON-INFRINGEMENT, COMPLETENESS, MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE) WITH RESPECT TO ANY OF THE INFORMATION.

Without limiting any of the foregoing and to the maximum extent permitted by applicable law, in no event shall any Information Provider have any liability regarding any of the Information for any direct, indirect, special, punitive, consequential (including lost profits) or any other damages even if notified of the possibility of such damages. The foregoing shall not exclude or limit any liability that may not by applicable law be excluded or limited, including without limitation (as applicable), any liability for death or personal injury to the extent that such injury results from the negligence or willful default of itself, its servants, agents or sub-contractors.

Information containing any historical information, data or analysis should not be taken as an indication or guarantee of any future performance, analysis, forecast or prediction. Past performance does not guarantee future results.

The Information should not be relied on and is not a substitute for the skill, judgment and experience of the user, its management, employees, advisors and/or clients when making investment and other business decisions. All Information is impersonal and not tailored to the needs of any person, entity or group of persons.

None of the Information constitutes an offer to sell (or a solicitation of an offer to buy), any security, financial product or other investment vehicle or any trading strategy.

It is not possible to invest directly in an index. Exposure to an asset class or trading strategy or other category represented by an index is only available through third party investable instruments (if any) based on that index. MSCI does not issue, sponsor, endorse, market, offer, review or otherwise express any opinion regarding any fund, ETF, derivative or other security, investment, financial product or trading strategy that is based on, linked to or seeks to provide an investment return related to the performance of any MSCI index (collectively, "Index Linked Investments"). MSCI makes no assurance that any Index Linked Investments will accurately track index performance or provide positive investment returns. MSCI Inc. is not an investment adviser or fiduciary and MSCI makes no representation regarding the advisability of investing in any Index Linked Investments.

Index returns do not represent the results of actual trading of investible assets/securities. MSCI maintains and calculates indexes, but does not manage actual assets. The calculation of indexes and index returns may deviate from the stated methodology. Index returns do not reflect payment of any sales charges or fees an investor may pay to purchase the securities underlying the index or Index Linked Investments. The imposition of these fees and charges would cause the performance of an Index Linked Investment to be different than the MSCI index performance.

The Information may contain back tested data. Back-tested performance is not actual performance, but is hypothetical. There are frequently material differences between back tested performance results and actual results subsequently achieved by any investment strategy.

Constituents of MSCI equity indexes are listed companies, which are included in or excluded from the indexes according to the application of the relevant index methodologies. Accordingly, constituents in MSCI equity indexes may include MSCI Inc., clients of MSCI or suppliers to MSCI. Inclusion of a security within an MSCI index is not a recommendation by MSCI to buy, sell, or hold such security, nor is it considered to be investment advice.

Data and information produced by various affiliates of MSCI Inc., including MSCI ESG Research LLC and Barra LLC, may be used in calculating certain MSCI indexes. More information can be found in the relevant index methodologies on [www.msci.com](http://www.msci.com).

MSCI receives compensation in connection with licensing its indexes to third parties. MSCI Inc.'s revenue includes fees based on assets in Index Linked Investments. Information can be found in MSCI Inc.'s company filings on the Investor Relations section of [msci.com](http://msci.com).

MSCI ESG Research LLC is a Registered Investment Adviser under the Investment Advisers Act of 1940 and a subsidiary of MSCI Inc. Neither MSCI nor any of its products or services recommends, endorses, approves or otherwise expresses any opinion regarding any issuer, securities, financial products or instruments or trading strategies and MSCI's products or services are not a recommendation to make (or refrain from making) any kind of investment decision and may not be relied on as such, provided that applicable products or services from MSCI ESG Research may constitute investment advice. MSCI ESG Research materials, including materials utilized in any MSCI ESG Indexes or other products, have not been submitted to, nor received approval from, the United States Securities and Exchange Commission or any other regulatory body. MSCI ESG and climate ratings, research and data are produced by MSCI ESG Research LLC, a subsidiary of MSCI Inc. MSCI ESG Indexes, Analytics and Real Estate are products of MSCI Inc. that utilize information from MSCI ESG Research LLC. MSCI Indexes are administered by MSCI Limited (UK).

Please note that the issuers mentioned in MSCI ESG Research materials sometimes have commercial relationships with MSCI ESG Research and/or MSCI Inc. (collectively, "MSCI") and that these relationships create potential conflicts of interest. In some cases, the issuers or their affiliates purchase research or other products or services from one or more MSCI affiliates. In other cases, MSCI ESG Research rates financial products such as mutual funds or ETFs that are managed by MSCI's clients or their affiliates, or are based on MSCI Inc. Indexes. In addition, constituents in MSCI Inc. equity indexes include companies that subscribe to MSCI products or services. In some cases, MSCI clients pay fees based in whole or part on the assets they manage. MSCI ESG Research has taken a number of steps to mitigate potential conflicts of interest and safeguard the integrity and independence of its research and ratings. More information about these conflict mitigation measures is available in our Form ADV, available at <https://adviserinfo.sec.gov/firm/summary/169222>.

Any use of or access to products, services or information of MSCI requires a license from MSCI. MSCI, Barra, RiskMetrics, IPD and other MSCI brands and product names are the trademarks, service marks, or registered trademarks of MSCI or its subsidiaries in the United States and other jurisdictions. The Global Industry Classification Standard (GICS) was developed by and is the exclusive property of MSCI and S&P Global Market Intelligence. "Global Industry Classification Standard (GICS)" is a service mark of MSCI and S&P Global Market Intelligence.

MIFID2/MIFIR notice: MSCI ESG Research LLC does not distribute or act as an intermediary for financial instruments or structured deposits, nor does it deal on its own account, provide execution services for others or manage client accounts. No MSCI ESG Research product or service supports, promotes or is intended to support or promote any such activity. MSCI ESG Research is an independent provider of ESG data.

Privacy notice: For information about how MSCI collects and uses personal data, please refer to our Privacy Notice at <https://www.msci.com/privacy-pledge>.
