

# MSCI Japan SRI Filtered ex Fossil Fuels 100% hedged to EUR Index (EUR)

The MSCI Japan SRI Filtered ex Fossil Fuels 100% hedged to EUR Index represents a close estimation of the performance that can be achieved by hedging the currency exposure of its parent index, the MSCI Japan Index, to the EUR, the "home" currency for the hedged index. The index is 100% hedged to the EUR by selling the USD forward at the one-month Forward rate. The Index is based on MSCI Japan, its parent index, which captures large and mid-cap representation of the Japanese markets. The index is designed for investors seeking a diversified Socially Responsible Investment (SRI) benchmark comprised of companies with strong sustainability profiles while avoiding companies incompatible with their values or have exposure to key fossil fuel-related business activities. Constituent selection is based on research provided by MSCI ESG Research. The Index is free float-adjusted market capitalization weighted and applies a 5% capping on issuer weights.

For a complete description of the index methodology, please see [Index methodology - MSCI](#).
