MSCI China A 50 Connect Index (USD)

The MSCI China A 50 Connect Index is constructed from the MSCI China A Index (the 'Parent Index'), a broad-based benchmark index which captures large and mid-cap China A shares listed on the Shanghai and Shenzhen exchanges and accessible through the Northbound Stock Connect channel*. The Index aims to reflect the performance of the 50 largest securities representing each Global Industry Classification Standard (GICS®) sector and reflecting the sector weight allocation of the Parent Index.

For a complete description of the index methodology, please see Index methodology - MSCI.

CUMULATIVE INDEX PERFORMANCE — PRICE RETURNS (USD) (NOV 2012 – OCT 2026)

*The Stock Connect program was established for connectivity of trading and clearing between mainland China's (Shanghai and Shenzhen) and Hong Kong's securities markets. The mechanism involves Northbound Trading and Southbound Trading: With Northbound Trading, international investors will be able to trade eligible securities in mainland China through the Hong Kong Exchange, whereas with Southbound Trading, mainland investors will be able to trade eligible securities in the Hong Kong through the Shanghai and Shenzhen exchanges.

The MSCI China A 50 Connect Index was launched on Aug 20, 2021. Data prior to the launch date is back-tested test (i.e. calculations of how the index might have performed over that time period had the index existed). There are frequently material differences between back-tested performance and actual results. Past performance -- whether actual or back-tested -- is no indication or guarantee of future performance.

MSCI FaCS provides absolute factor exposures relative to a broad global index - MSCI ACWI IMI.

Neutral factor exposure (FaCS = 0) represents MSCI ACWI IMI.

SECTOR WEIGHTS

MSCI FACTOR BOX AND FaCS FRAMEWORK (Please refer to complete description of the MSCI FaCS methodology here)

MSCI FaCS is a standard method for evaluating and reporting the Factor characteristics of equity portfolios. MSCI FaCS consists of Factor Groups (e.g. Value, Size, Momentum, Quality, Yield, and Volatility) that have been extensively documented in academic literature and validated by MSCI Research as key drivers of risk and return in equity portfolios. These Factor Groups are constructed by aggregating 16 factors (e.g. Book-to-Price, Earnings/Dividend Yields, LT Reversal, Leverage, Earnings Variability/Quality, Beta) from the latest Barra global equity factor risk model, GEMLT, designed to make fund comparisons transparent and intuitive for use. The MSCI Factor Box, which is powered by MSCI FaCS, provides a visualization designed to easily compare absolute exposures of funds/indexes and their benchmarks along 6 Factor Groups that have historically demonstrated excess market returns over the long run.

ABOUT MSCI

MSCI (NYSE: MSCI Inc.) strengthens global markets by connecting participants across the financial ecosystem with a common language. Our research-based data, analytics and indexes, supported by advanced technology, set standards for global investors and help our clients understand risks and opportunities so they can make better decisions and unlock innovation. We serve asset managers and owners, private-market sponsors and investors, hedge funds, wealth managers, banks, insurers and corporates. To learn more, please visit www.msci.com.
