# MSCI USA Advanced Selection Index (USD)

The MSCI USA Advanced Selection Index is a free float-adjusted market capitalization-weighted index designed to represent the performance of companies that are selected from an underlying index based on Environmental, Social and Governance (ESG) criteria. These criteria exclude constituents based on involvement in specific business activities, as well as ESG ratings and exposure to ESG controversies. The Index is derived from underlying MSCI USA index and aim to achieve sector weights that reflect the sector weights of the corresponding Parent Index. The Index construction targets 50% free float-adjusted market capitalization coverage of each Global Industry Classification Standard (GICS®) sector by selecting constituents primarily based on criteria including the ESG rating and the company's industry-adjusted ESG score.

For a complete description of the index methodology, please see Index methodology - MSCI.

The MSCI USA Advanced Selection Index was launched on Aug 23, 2024. Data prior to the launch date is back-tested test (i.e. calculations of how the index might have performed over that time period had the index existed). There are frequently material differences between back-tested performance and actual results. Past performance -- whether actual or back-tested -- is no indication or guarantee of future performance.
