

MSCI Saudi Arabia IMI (USD)

The MSCI Saudi Arabia Investable Market Index (IMI) is designed to measure the performance of the large, mid and small-cap segments of the Saudi Arabia market. The index incorporates foreign ownership limit restrictions. With 79 constituents, the index covers approximately 99% of the free float-adjusted market capitalization in Saudi Arabia.

CUMULATIVE INDEX PERFORMANCE – NET RETURNS (USD) (AUG 2014 – MAR 2021)

ANNUAL PERFORMANCE (%)

Year	MSCI Saudi Arabia IMI	MSCI Saudi Arabia

¹ Last 12 months

² Based on monthly net returns data

³ Based on ICE LIBOR 1M

The MSCI Saudi Arabia IMI was launched on Oct 03, 2014. Data prior to the launch date is back-tested data (i.e. calculations of how the index might have performed over that time period had the index existed). There are frequently material differences between back-tested performance and actual results. Past performance – whether actual or back-tested – is no indication or guarantee of future performance.

- Consumer Discretionary 2.88%
- Health Care 2.58%
- Utilities 2.24%
- Real Estate 1.49%
- Industrials 1.15%

INDEX METHODOLOGY

The MSCI Saudi Arabia Indexes were launched as Standalone Market Indexes effective June 1, 2015, coinciding with the opening of the Saudi Arabia equity market to foreign direct investment. The indexes were transitioned from the MSCI Provisional Saudi Arabia Indexes as part of the May 2015 Semi-Annual Index Review. The MSCI Saudi Arabia Indexes follow the MSCI Global Investable Market Indexes methodology using the Emerging Markets size and liquidity requirements.

The indexes incorporate Foreign Ownership Limit restrictions as per the "Rules for Qualified Foreign Financial Institutions Investment in Listed Shares" that were released on May 4, 2015 by the Saudi Arabia Capital Market Authority. Under these rules, Qualified Foreign Investors (QFIs) are in general allowed to own a maximum of 20% of the shares of a listed company. In addition, MSCI monitors foreign room for Saudi Arabia securities against both the 20% ownership limit applicable to QFIs and the 49% ownership limit applicable to all foreign investors.

FACTOR BOX AND FaCS METHODOLOGY

MSCI FaCS is a standard method ([MSCI FaCS Methodology](#)) for evaluating and reporting the Factor characteristics of equity portfolios. MSCI FaCS consists of Factor Groups (e.g. Value, Size, Momentum, Quality, Yield, and Volatility) that have been extensively documented in academic literature and validated by MSCI Research as key drivers of risk and return in equity portfolios. These Factor Groups are constructed by aggregating 16 factors (e.g. Book-to-Price, Earnings/Dividend Yields, LT Reversal, Leverage, Earnings Variability/Quality, Beta) from the latest Barra global equity factor risk model, GEMLT, designed to make fund comparisons transparent and intuitive for use. The MSCI Factor Box, which is powered by MSCI FaCS, provides a visualization designed to easily compare absolute exposures of funds/indexes and their benchmarks along 6 Factor Groups that have historically demonstrated excess market returns over the long run.

ABOUT MSCI

MSCI is a leading provider of critical decision support tools and services for the global investment community. With over 45 years of expertise in research, data and technology, we power better investment decisions by enabling clients to understand and analyze key drivers of risk and return and confidently build more effective portfolios. We create industry-leading research-enhanced solutions that clients use to gain insight into and improve transparency across the investment process. To learn more, please visit www.msci.com.
