MSCI ESG Ratings overview .....	3
Frequently asked questions.....	3

## INTRODUCTION

ESG Issuer Communications is the main point of contact for all companies in the MSCI ESG Research coverage universe. This guidance provides a summary overview of the ESG Ratings methodology used by MSCI ESG Research, and a list of frequently asked questions about this research. For questions pertaining to the either ESG Research reports and our company interaction process more generally, please refer to our [General FAQ](#). This document will be updated periodically.

## MSCI ESG RATINGS OVERVIEW

MSCI ESG Ratings are designed to help institutional investors identify Environmental, Social, and Governance (ESG) risks and opportunities. Companies are assessed and rated on a 'AAA' to 'CCC' scale according to their exposure to industry specific ESG risks and their ability to manage those risks relative to industry peers. We rate over 7,500 companies (13,500 issuers, including subsidiaries) and more than 650,000 equity and fixed income securities globally<sup>1</sup>. Below are the four key steps in providing an ESG rating.

### Step 1: Evaluate corporate governance

MSCI ESG Ratings analyses begins with an examination across governance structures, director-level data, governance events et al. Corporate Governance is a universal key issue evaluated for every company in our coverage universe.

### Step 2: Identify key issues by industry

The model adopts a quantitative approach to objectively identify economically relevant key issues (risks and opportunities) by industry. Once key issues are identified at the industry level, they are assigned to each company within the industry. MSCI ESG Ratings identify six to ten key ESG issues for companies in the industry that currently generate large environmental or social externalities; these are issues that may force some companies to absorb unanticipated costs associated with those externalities in the future.

### Step 3: Score key issues (0-10)

We assess thousands of data points across 37 ESG Key Issues, focusing on the intersection between a company's core business and the industry issues that can

---

<sup>1</sup> As of October 2019, MSCI ESG Research LLC.

create significant risks and opportunities for the company. However, our model focuses on risk exposure and not just corporate disclosure. To understand whether a company is adequately managing a key ESG risk, it is essential to understand both what management strategies it has employed and how exposed it is to the relevant risk. The MSCI ESG Ratings model measures both: risk exposure and risk management. All 37 Key Issues are listed in the Appendix.

#### **Step 4: Final ESG Rating (CCC-AAA)**

To arrive at a final letter rating, the weighted averages of the Key Issue Scores are aggregated and companies' scores are normalized by their industries. After any overrides are factored in, each company's Final Industry-Adjusted Score corresponds to a rating between best (AAA) and worst (CCC). These assessments of company performance are not absolute but are explicitly intended to be relative to the standards and performance of a company's industry peers.

## **FREQUENTLY ASKED QUESTIONS**

The most common questions that ESG Issuer Communications receive from global companies relate to the construction of our ESG Ratings. Below is a curated list of frequently asked methodology questions by issuers.

### **1. HOW ARE PEERS SETS CONSTRUCTED?**

The Industry peer groups are typically standardized and determined by Global Industry Classification Standard (GICS®). In general, there is no analyst selection involved. Please note that the peers listed on page 4 or 5 in the ESG Ratings report are the five largest peers in the GICS® industry by market cap. It is only a subset of the peer set, not the full list.

### **2. HOW ARE KEY ISSUES DETERMINED?**

ESG Key Issues are determined by a quantitative model based on intensity factors that allows different companies' core businesses to be comparable. All key issues and their relevance are reviewed by industry analysts annually and are discussed with clients as part of the client consultation process, where appropriate. The Environmental, Social and Corporate Behavior Key Issues vary between industries, but all companies in all industries are evaluated on the same Corporate Governance theme. ESG Key Issues are selected based on the extent

to which the business activities of the companies in each industry generate large environmental, social or governance-related externalities.

### 3. HOW ARE KEY ISSUE WEIGHTS DETERMINED?

Once the key issues have been selected for a GICS® Sub-Industry, we set the weights that determine each key issue’s contribution to the overall rating. Each key issue typically comprises 5 to 30% of the total ESG Rating. The weightings consider both the contribution of the industry, relative to all other industries, to the negative or positive impact on the environment or society; and the timeline within which we expect that risk or opportunity for companies in the industry to materialize, as illustrated conceptually below (excerpt from the full ESG Ratings Methodology).

Figure 1: Framework for Setting Key Issue Weights

		Expected Time frame for Risk/Opportunity to Materialize	
		Short-Term (<2 years)	Long-Term (5+ years)
Level of Contribution to Environmental or Social Impact	Industry is major contributor to impact	Highest Weight	
	Industry is minor contributor to impact		Lowest Weight

### 4. MY COMPANY HAS A VARIETY OF BUSINESSES/ MY COMPANY’S BUSINESS IS DIFFERENT FROM OUR PEERS. HOW DO YOU ACCOUNT FOR BUSINESS SPECIFICITIES AT A KEY ISSUE LEVEL?

In some cases, a company may face a unique set of environmental, social or governance Key Issues that is not shared by other companies in its industry. This can arise from several scenarios, ranging from companies with unique or diversified business models to subsets of companies within an industry that face a unique set of risks. In these cases, a Company-Specific Key Issue is added to the analysis and the weights on the remaining Key Issues are reduced proportionally.

### 5. HOW IS RISK EXPOSURE DETERMINED?

Most key issues, although not all, consist of two components: risk exposure and risk management. This dichotomy allows the model to adjust the strength of

management systems required to achieve a given key issue score: companies facing higher risk exposure must have stronger management practices in place to mitigate their risks.

On the risk side, MSCI ESG Research has developed a proprietary risk exposure model. Our assessment of exposure is comprised of three different areas of analysis, depending on the key issue:

**Business Segment Risk Exposure** – analyzes the breakdown of a company’s business segments in terms of revenues, assets, or operations

**Geographic Segment Risk Exposure** – analyzes the breakdown of a company’s geographic segments in terms of revenues, assets, or operations

**Company-Level Risk Exposure factors** – such as number of employees, size, reliance on government contracts, or reliance on outsourced production

We utilize a variety of sources to determine the risk exposure level/scores for each of the areas.

For example, on Labor Management, Company X’s risk exposure is determined to be high based on the type of business it is involved in (percent of operations in business segments with high labor intensity, as measured by average sales per employee), and the location of its operations (percent of operations in countries with high likelihood of labor unrest, based on historic precedent). The key issue also looks at additional factors, such as workforce size, recent restructuring, etc. The exposure side of this assessment does not consider Company X’s track record in avoiding labor disputes or work stoppages. This would be a performance measure evaluated under the risk management side of the key issue assessment.

## 6. HOW IS THE WAKI SCORE CONVERTED TO IAS?

The Industry Adjusted Score (IAS) is defined by the Weighted Average Key Issue score (WAKI) and normalized based on score ranges set by the benchmark companies in the peer set.

The adjusted score of 10 is defined at the 97.5th percentile of the benchmark industry, and the adjusted score of 0 is defined at the 2.5th percentile of the benchmark industry, based on historically observed values. The score ranges are re-evaluated at the beginning of each calendar year. These assessments of company performance are not absolute but are explicitly intended to be relative to the standards and performance of a company’s industry peers.

**7. OUR COMPANY’S WEIGHTED AVERAGE KEY ISSUE SCORE (WAKI) HAS CHANGED BUT THE INDUSTRY ADJUSTED SCORE (IAS) REMAINS THE SAME. WHY?**

The Weighted-Average Key Issue score is dynamic, reflecting changes in any underlying scores as of the Last Update date, while the Industry Adjusted (relative) Score is relatively static and corresponds to the Rating action date, and is updated when the overall rating changes. Score ranges for the Industry Adjusted score are re-evaluated at the beginning of each calendar year.

For more about score update timing, please refer to [General FAQ Q 3.1](#).

**8. WE DON’T REPORT CARBON EMISSIONS DATA. WHERE DID THE EMISSIONS DATA COME FROM?**

Where companies do not report this information, we estimate based on MSCI ESG Research proprietary carbon estimation methodology. However, if the company does report carbon data publicly, please let us know, including the link to where this information can be found in the public domain. We will review and make the necessary updates, replacing the estimates where appropriate.

**9. WHAT IS INCLUDED IN THE R&D EXPENSES FOR THE OPPORTUNITIES IN CLEAN TECH KEY ISSUE?**

In general, we capture R&D expense data from the Consolidated Financial Statements disclosed by the company in its Annual Report. If the company reports a breakdown of its R&D expense that separates out Capitalized R&D from R&D expenses recognized as costs, we would exclude the capitalized amount and report the remaining figure. We do not consider R&D capitalized cost as part of the Research and Development expenses. Capitalized cost is considered to be an asset, and thus not included in R&D expense.

Furthermore, we report the figures disclosed by the company on its Annual Report for that specific fiscal year. If the company restated its expenses based on change in Accounting Principles, we would not restate historical figures since it would not accurately reflect the amount reported by the company in the previous years. Likewise, if the restatement was due to a corporate event (e.g., an acquisition, or spin-off), we would not restate historical figures, since it would not accurately reflect the amount of R&D expenses that the company had at the time.

We use USD as the main currency. If the company reports R&D expenses in local currency, this is converted to USD using the exchange rate date as of the fiscal year end date of the company. Discrepancy between the numbers might be caused by foreign exchange rate difference. We would not typically update minor discrepancies on an ad-hoc basis.

**10. WHAT IS THE BEST PRACTICE FOR FREQUENCY IN EMPLOYEE ENGAGEMENT SURVEYS?**

General best practice in terms of frequency of employee surveys is *annual*. Per our scoring, a company that conducts engagement surveys at any other regular frequency (e.g. every two years) will typically be assessed as “sporadically”. While we are always looking to refine our indicators, this is currently the standardized scoring level.

**11. OUR COMPANY BELIEVES THAT NOT HAVING A UNION IS AN INDICATION OF STRENGTH IN OUR LABOR MANAGEMENT. BUT MSCI APPEARS TO SCORE US NEGATIVELY FOR OUR LOW UNIONIZATION RATE. WHY IS THIS?**

MSCI does not have an official position on merits of unionization. However, for our Labor Management key issue, we use unionization rate as a proxy for the presence of basic employee rights and benefits. Therefore, in this context, a higher unionization rate would score more positively for this indicator. Having said that, a company with low or no unionization rate could still receive a higher management score if it had strong performance on all other metrics

**12. HOW IS THE SCORE FOR TAX TRANSPARENCY DETERMINED?**

We evaluate the extent to which companies may face enhanced public and regulatory scrutiny as well as potential liabilities because of actual or perceived avoidance of corporate income taxes. Scores are based on the gap between the company’s estimated effective tax rate and the estimated statutory tax rate if the company were paying taxes as per the statutory tax rates in the jurisdictions where it generated revenues. Scores are also adjusted based on the disclosure transparency around breakdown of revenues by country; whether a company is predominantly domestic; whether it is classified as a tax-favored structure such as REITs; and by involvement in controversies.

For more information, please see our issue brief: [The Tax Gap – Regulatory responses and Implications for Investors](#). Please note that for most companies, this issue is 0% weighted and is considered an additional ESG issue, not impacting the overall ESG Rating assessment.

## APPENDIX

### MSCI ESG Key Issue Hierarchy

3 Pillars	10 Themes	37 ESG Key Issues	
<b>Environment</b>	<b>Climate Change</b>	Carbon Emissions Product Carbon Footprint	Financing Environmental Impact Climate Change Vulnerability
	<b>Natural Resources</b>	Water Stress Biodiversity & Land Use	Raw Material Sourcing
	<b>Pollution &amp; Waste</b>	Toxic Emissions & Waste Packaging Material & Waste	Electronic Waste
	<b>Environmental Opportunities</b>	Opportunities in Clean Tech Opportunities in Green Building	Opportunities in Renewable Energy
<b>Social</b>	<b>Human Capital</b>	Labor Management Health & Safety	Human Capital Development Supply Chain Labor Standards
	<b>Product Liability</b>	Product Safety & Quality Chemical Safety Financial Product Safety	Privacy & Data Security Responsible Investment Health & Demographic Risk
	<b>Stakeholder Opposition</b>	Controversial Sourcing	
	<b>Social Opportunities</b>	Access to Communications Access to Finance	Access to Health Care Opportunities in Nutrition & Health
<b>Governance</b>	<b>Corporate Governance*</b>	Board* Pay*	Ownership* Accounting*
	<b>Corporate Behavior</b>	Business Ethics Anti-Competitive Practices Tax Transparency	Corruption & Instability Financial System Instability

\* Corporate Governance Theme carries weight in the ESG Rating model for all companies. In 2018, we introduced sub-scores for each of the four underlying issues: Board, Pay, Ownership and Accounting.

## ABOUT MSCI

MSCI is a leading provider of critical decision support tools and services for the global investment community. With over 45 years of expertise in research, data and technology, we power better investment decisions by enabling clients to understand and analyze key drivers of risk and return and confidently build more effective portfolios. We create industry-leading research-enhanced solutions that clients use to gain insight into and improve transparency across the investment process.

### About MSCI ESG Research Products and Services

\* = toll free

MSCI ESG Research products and services are provided by MSCI ESG Research LLC, and are designed to provide in-depth research, ratings and analysis of environmental, social and governance-related business practices to companies worldwide. ESG ratings, data and analysis from MSCI ESG Research LLC. are also used in the construction of the MSCI ESG Indexes. MSCI ESG Research LLC is a Registered Investment Adviser under the Investment Advisers Act of 1940 and a subsidiary of MSCI Inc.

The Information may not be modified, reverse-engineered, reproduced or disseminated in whole or in part without prior written permission from MSCI.

The Information may not be used to create derivative works or to verify or correct other data or information. For example (but without limitation), the Information may not be used to create indexes, databases, risk models, analytics, software, or in connection with the issuing, offering, sponsoring, managing or marketing of any securities, portfolios, financial products or other investment vehicles utilizing or based on, linked to, tracking or otherwise derived from the Information or any other MSCI data, information, products or services.

The user of the Information assumes the entire risk of any use it may make or permit to be made of the Information. NONE OF THE INFORMATION PROVIDERS MAKES ANY EXPRESS OR IMPLIED WARRANTIES OR REPRESENTATIONS WITH RESPECT TO THE INFORMATION (OR THE RESULTS TO BE OBTAINED BY THE USE THEREOF), AND TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, EACH INFORMATION PROVIDER EXPRESSLY DISCLAIMS ALL IMPLIED WARRANTIES (INCLUDING, WITHOUT LIMITATION, ANY IMPLIED WARRANTIES OF ORIGINALITY, ACCURACY, TIMELINESS, NON-INFRINGEMENT, COMPLETENESS, MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE) WITH RESPECT TO ANY OF THE INFORMATION.

Without limiting any of the foregoing and to the maximum extent permitted by applicable law, in no event shall any Information Provider have any liability regarding any of the Information for any direct, indirect, special, punitive, consequential (including lost profits) or any other damages even if notified of the possibility of such damages. The foregoing shall not exclude or limit any liability that may not by applicable law be excluded or limited, including without limitation (as applicable), any liability for death or personal injury to the extent that such injury results from the negligence or willful default of itself, its servants, agents or sub-contractors.

Information containing any historical information, data or analysis should not be taken as an indication or guarantee of any future performance, analysis, forecast or prediction. Past performance does not guarantee future results.

The Information should not be relied on and is not a substitute for the skill, judgment and experience of the user, its management, employees, advisors and/or clients when making investment and other business decisions. All Information is impersonal and not tailored to the needs of any person, entity or group of persons.

None of the Information constitutes an offer to sell (or a solicitation of an offer to buy), any security, financial product or other investment vehicle or any trading strategy.

It is not possible to invest directly in an index. Exposure to an asset class or trading strategy or other category represented by an index is only available through third party investable instruments (if any) based on that index. MSCI does not issue, sponsor, endorse, market, offer, review or otherwise express any opinion regarding any fund, ETF, derivative or other security, investment, financial product or trading strategy that is based on, linked to or seeks to provide an investment return related to the performance of any MSCI index (collectively, "Index Linked Investments"). MSCI makes no assurance that any Index Linked Investments will accurately track index performance or provide positive investment returns. MSCI Inc. is not an investment adviser or fiduciary and MSCI makes no representation regarding the advisability of investing in any Index Linked Investments.

Index returns do not represent the results of actual trading of investible assets/securities. MSCI maintains and calculates indexes, but does not manage actual assets. Index returns do not reflect payment of any sales charges or fees an investor may pay to purchase the securities underlying the index or Index Linked Investments. The imposition of these fees and charges would cause the performance of an Index Linked Investment to be different than the MSCI index performance.

The Information may contain back tested data. Back-tested performance is not actual performance, but is hypothetical. There are frequently material differences between back tested performance results and actual results subsequently achieved by any investment strategy.

Constituents of MSCI equity indexes are listed companies, which are included in or excluded from the indexes according to the application of the relevant index methodologies. Accordingly, constituents in MSCI equity indexes may include MSCI Inc., clients of MSCI or suppliers to MSCI. Inclusion of a security within an MSCI index is not a recommendation by MSCI to buy, sell, or hold such security, nor is it considered to be investment advice.

Data and information produced by various affiliates of MSCI Inc., including MSCI ESG Research LLC and Barra LLC, may be used in calculating certain MSCI indexes. More information can be found in the relevant index methodologies on [www.msci.com](http://www.msci.com).

MSCI receives compensation in connection with licensing its indexes to third parties. MSCI Inc.'s revenue includes fees based on assets in Index Linked Investments. Information can be found in MSCI Inc.'s company filings on the Investor Relations section of [www.msci.com](http://www.msci.com).

MSCI ESG Research LLC is a Registered Investment Adviser under the Investment Advisers Act of 1940 and a subsidiary of MSCI Inc. Except with respect to any applicable products or services from MSCI ESG Research, neither MSCI nor any of its products or services recommends, endorses, approves or otherwise expresses any opinion regarding any issuer, securities, financial products or instruments or trading strategies and MSCI's products or services are not intended to constitute investment advice or a recommendation to make (or refrain from making) any kind of investment decision and may not be relied on as such. Issuers mentioned or included in any MSCI ESG Research materials may include MSCI Inc., clients of MSCI or suppliers to MSCI, and may also purchase research or other products or services from MSCI ESG Research. MSCI ESG Research materials, including materials utilized in any MSCI ESG Indexes or other products, have not been submitted to, nor received approval from, the United States Securities and Exchange Commission or any other regulatory body.

Any use of or access to products, services or information of MSCI requires a license from MSCI. MSCI, Barra, RiskMetrics, IPD and other MSCI brands and product names are the trademarks, service marks, or registered trademarks of MSCI or its subsidiaries in the United States and other jurisdictions. The Global Industry Classification Standard (GICS) was developed by and is the exclusive property of MSCI and Standard & Poor's. "Global Industry Classification Standard (GICS)" is a service mark of MSCI and Standard & Poor's.

MIFID2/MIFIR notice: MSCI ESG Research LLC does not distribute or act as an intermediary for financial instruments or structured deposits, nor does it deal on its own account, provide execution services for others or manage client accounts. No MSCI ESG Research product or service supports, promotes or is intended to support or promote any such activity. MSCI ESG Research is an independent provider of ESG data, reports and ratings based on published methodologies and available to clients on a subscription basis. We do not provide custom or one-off ratings or recommendations of securities or other financial instruments upon request.
