Benchmark Statement: BMR Benchmarks in the MSCI Property Fund (with published NAV) Benchmark Family

The BMR Benchmarks in the MSCI property fund (with published NAV) benchmark family consists of those MSCI Property Fund Indexes for which MSCI Limited (the benchmark administrator for this family) has provided written permission in each instance to its client to be used for use under Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016 on indexes used as benchmarks (“BMR”). The process to request BMR regulated use can be found on the index regulation page of MSCI’s website at www.msci.com/index-regulation. MSCI Property Fund Indexes that have been permissioned for use are referred to as “BMR Benchmarks”.

Currently, with respect to the BMR Benchmarks in the MSCI property fund (with published NAV) benchmark family, MSCI will only consider client requests for BMR regulated use for the following ‘Standard’¹ MSCI Property Fund Index or indexes calculated from such a Standard Index using pre-configured specifications:

- MSCI/AREF UK Quarterly Property Fund Index

All BMR Benchmarks must have frozen history.

Please note, BMR Benchmarks are a subset of the MSCI Property Fund Indexes which are a subset of the MSCI Private Real Estate Indexes.

¹ “Standard Indexes” are the MSCI Private Real Estate Index for a country or region with the broadest market coverage, for a specific index methodology, and for a specific reporting frequency. For example, UK Standard Indexes include, among others, the MSCI UK Quarterly Property Index, MSCI UK Annual Property Index, and MSCI/AREF UK Quarterly Property Fund Index.

1 Objectives of the Benchmarks in the Family

BMR Benchmarks in the MSCI property fund (with published NAV) benchmark family aim to accurately and objectively measure the performance of unlisted pooled structures, including the effects of cash holdings, leverage and fund operating costs, fees as well as the returns to the underlying real estate assets.

Benchmarks in this family include UK property funds.

Each MSCI Private Real Estate Index is governed by a number of methodology documents (“Methodology Set”). The Methodology Set for benchmarks in the MSCI property fund (with published NAV) benchmark family includes the following documents, all of which are published on www.msci.com:

Global Methodology Standards for Real Estate Investments

MSCI Real Estate – Index Policies

MSCI Property Fund Indexes Methodology

MSCI/AREF UK Quarterly Property Fund Index Methodology

MSCI Real Estate – BMR Benchmarks Methodology Specifications

This family contains only ‘Non-Significant’ benchmarks as defined by the BMR².

² Under the EU Benchmarks Regulation (Regulation (EU) 2016/1011), a *Non-Significant Benchmark* is a benchmark that does not meet the quantitative thresholds defining *Critical* or *Significant* benchmarks. For further details please refer to: [Regulation - 2016/1011 - EN - Benchmark Regulation - EUR-Lex](#)

2 Methodology and Index Design Guidelines and Reviews

MSCI Private Real Estate Indexes aim to accurately and objectively measure the performance of a private real estate investment market, market segment or strategy as represented by private real estate investment data available to MSCI. This data is primarily provided on a voluntary basis by or on behalf of institutional private real estate investors and managers. These investments are illiquid and heterogeneous, and data related to these investments are not widely available and there are no substitutes.

This objective is clearly stated in the specific methodology documentation.

MSCI Private Real Estate Indexes are constructed with the following goals in mind:

- Representativeness
- Data quality
- Timeliness

Index methodologies are rules-based and aim to find the right balance between representativeness of the underlying market, market segment or strategy, as well as the quality of available data and the timeliness of reporting the results to the market.

The rationale for adopting each specific methodology is based on a thorough review of the market, market segment or strategy the indexes are intended to represent.

MSCI Private Real Estate Indexes are updated monthly, quarterly, bi-annually or annually as applicable to the relevant index. BMR Benchmarks are updated at the frequency of the Standard Index to which they are associated.

The MSCI Property Fund Index methodology is the primary methodology for benchmarks in this family and is formally reviewed at least annually. The objective of the review is to ensure the methodology continues to reflect its stated objective and complies with the index design guidelines. Specifications for BMR Benchmarks are also reviewed annually.

3 Index Content Governance

The Private Asset Index Committee (“PAIC”) presides over content matters relating to its indexes, such as the development and interpretation of MSCI Private Real Estate index methodologies.

The PAIC is primarily responsible for supervising the design, development, approval and interpretation of index methodologies. Additionally, the PAIC governs the data validation and verification processes applied to input data. PAIC discussions may be informed by feedback from the investment community. Nonetheless, all decisions taken by the committee are the sole responsibility of its members.

MSCI’S Index Policy Committee (“IPC”) serves as an escalation point for the PAIC on complex matters.

All of the committees are staffed solely by MSCI employees with extensive relevant experience. All committees have explicit terms of reference, and all decisions are appropriately documented and archived.

4 Input Data and Index Calculation

The input data for this family is the Net Asset Value (“NAV”), distributions and number of units of each of the funds included in the relevant BMR Benchmark as supplied by its data providers. There are no substitutes for fund NAVs, distributions and number of units and therefore no priority of use of input data for this family.

This input data is published on the MSCI website at each index release. Because the data is publicly available, the data is considered “readily available” and is not “contribution of input data” under the BMR.

Input data is provided on a voluntary basis by or on behalf of institutional private real estate fund managers (“data providers”) for the determination of the MSCI Private Real Estate Indexes. All such data providers are subject to the MSCI Real Estate Data Provider Code of Conduct.

The MSCI Real Estate Data Provider Code of Conduct specifies the responsibilities, requirements, and expectations of data providers with respect to the data they provide to MSCI for the determination of the MSCI Private Real Estate Indexes. Non-compliance may result in exclusion from the MSCI Private Real Estate Indexes.

The rules for index construction, maintenance and calculation are contained in publicly available methodology documents and complemented with internal guidelines and operating procedures. Each process is conducted by well-trained personnel according to documented rules and operating procedures.

BMR Benchmarks are calculated in currencies that are specified in the benchmark name.

5 Judgment and Discretion

MSCI has a rules-based approach for data validation and verification. Outliers identified as part of this process require explanations and the decisions to exclude or include a property or fund from or in an index based on explanations require judgment and is therefore subject to a hierarchy of MSCI review. Cases where there is no consensus amongst MSCI reviewers or those that are complex are escalated to the PAIC for final decision on inclusion or exclusion.

MSCI's rules-based index methodologies and operating procedures are designed to ensure that discretion is not used in other aspects of the production of the indexes except in unusual cases not effectively addressed by the methodologies or operating procedures. These include, but may not be limited to:

- Temporary or permanent unavailability of data,
- Structural changes to the underlying markets,
- Geo-political events and regulatory changes,
- Events beyond human control.

Where there is a need to take action that is not prescribed in the methodologies or operating procedures, a proposal is developed with the goal of remaining consistent with the objectives of the methodology and ensuring timely calculation and distribution of the indexes. This proposal is then reviewed and, if appropriate, approved by the PAIC.

In cases which are deemed material and where time permits, MSCI may consult with clients on the proposed approach. MSCI announces the decided action on the MSCI website.

Typically, MSCI does not perform explicit ex-post analysis of decisions, but always welcomes feedback from market participants on decisions made.

The framework described above aims to prevent the exercise of judgment or discretion by any one individual and ensure that any interpretation of data validity or methodology is managed through a hierarchy of MSCI review or escalation to the PAIC, if necessary.

6 Corrections

MSCI Private Real Estate Indexes having unfrozen history incorporate all available data, including historical data corrections regardless of time of occurrence or threshold, at each index update. Normal procedures for updating unfrozen index history include changes to the constituent funds within a given index as well as other data updates which can change the history of an index. As such, unfrozen indexes reflect the best information available at each release date and are restated for historical changes only at the next scheduled release³.

MSCI applies a 36-month correction period for index errors with a material impact on a Standard MSCI Private Real Estate Index.

A 'material impact' for MSCI Property Fund Indexes is a change of greater than 50 bps trailing 12-month net total return.

Errors discovered that are older than 36 months are generally not corrected.

There may be certain circumstances not defined by this policy, where MSCI may also correct and restate history, subject to PAIC review and approval.

Restatements of a Standard Index history as the result of a correction will be published in an announcement on the MSCI website with an explanation of the corrections made.

BMR Benchmarks will be restated if the associated Standard Index is restated.

³ Once constituent data has been used in the earliest applicable index release, it remains unchanged in all subsequent country, peer-group, regional, and higher-level indexes (with the same publication frequency). For e.g. constituent data used to construct US ACOE published in Q1 2025 that also contributes to US AFOE published in Q1 2025, remains unchanged.

7 Methodology and Index Consultations

Material methodology changes to the MSCI Private Real Estate Index methodologies are infrequent. When faced with a situation that may result in a material methodology change to a MSCI Private Real Estate Index methodology, to inform its decision process, MSCI seeks to understand the differing perspectives through its consultation process. Consultations provide essential feedback for increasing transparency, providing access to information, fueling innovation and improvement, and ensuring the on-going relevance of the indexes. After considering the feedback from the consultation process, the decision remains the responsibility of MSCI solely, through the PAIC.

Consultation papers and discussions with market participants are an ideal channel to share the reasoning and the motivation behind MSCI proposals. Structured dialogues enable market participants to share their views, and public consultations give them the lead time they need to fully evaluate potential index changes and implications.

MSCI commences a consultation when the PAIC supports a proposal that could result in a material methodology change typically resulting from either market-related developments or regular methodology or index reviews.

Once the decision to open a consultation has been taken by the PAIC, a consultation document is created which describes the consultation topic and, in some cases, presents either the initial thinking on the matter or a draft proposal. This document is approved by the PAIC before it is made available publicly, including the date by which feedback must be provided to MSCI.

A consultation begins in general with a communication giving the highlights of the MSCI proposal(s) and the location of the consultation document on MSCI's website. MSCI will accept consultation feedback electronically or gather feedback through phone calls and meetings.

Once MSCI has gathered all required feedback, MSCI will analyze the views and formulate an informed recommendation that will be presented, discussed and debated at the PAIC. The PAIC will take the final decision on the proposal.

The final decision, including the rationale that has led to it, and the timeframe for the implementation of the change, if any, is made publicly available. Most consultation participants request that their feedback remains confidential. MSCI may nevertheless publicly disclose feedback if specifically requested by respective market participants. In that case, the relevant feedback would be published together with the final results of the consultation.

If the final decision is to change the methodology, MSCI updates the relevant methodology documentation subsequently.

The length of a consultation and lead time provided for implementation varies depending on the complexity of the topic, breadth of client impact as well as impact on the index and is clearly communicated as part of the consultation process. The length of a consultation needs to be sufficient for market participants to meaningfully review what is proposed and respond.

Changes to specifications to BMR Benchmarks are addressed directly with the relevant permissioned clients.

8 Index Terminations

MSCI Private Real Estate Indexes may need to be terminated under certain circumstances where the methodology no longer achieves its objective and cannot be effectively adapted. These circumstances are generally not fully within MSCI's control and may include significant reduction in the availability of data, which is provided voluntarily, changes in the structure of the underlying market, geo-political events, and regulatory changes. Additionally, factors such as low usage of an index may result in MSCI's proposal to terminate the index.

If a Standard Index termination is proposed or required, MSCI would proceed as follows:

- MSCI would investigate any opportunities to remedy the situation, including making efforts to increase the index coverage and improve data quality.
- The PAIC would review the impact and approve appropriateness of a potential termination.
- MSCI may perform a consultation including a discussion of possible alternatives, if any.
- MSCI would publicly announce any termination of the index in advance.
- If practicable, MSCI would continue to calculate the index for an announced period of time to give users the opportunity to transition to another index or otherwise prepare for the termination of the MSCI index.
- In the event that an appropriate alternative index is established, the details of the methodology governing this index as well as the timing of the transition would be publicly communicated in advance of implementation.

Indexes that are created from Standard Indexes will also be terminated if the Standard Index is terminated.

Any index may be discontinued or suspended, without notice, if fewer than the required minimum number of funds are eligible and available for inclusion, or if a one fund dominates the composition, when applying a given methodology to a market. MSCI may resume calculation of such indexes if over time enough funds become eligible and available.

The potential termination of a BMR Benchmark would be addressed directly with relevant permissioned clients.

9 Index Usage

MSCI Private Real Estate Indexes may be used for a variety of purposes, ranging from research to portfolio analysis to performance reporting. They are used by a variety of market participants including asset owners, portfolio managers and researchers. Not all MSCI Private Real Estate Indexes are appropriate for all potential uses. Market participants and data users should use their judgment when selecting an index for a particular purpose.

MSCI Private Real Estate Indexes and the effectiveness of methodologies can be affected by a large number of factors, most of which are beyond MSCI's control. These factors may include structural changes in the underlying market, loss of voluntary data provision, geo-political events and regulatory changes. These circumstances may result in a material change to the index and MSCI may change the methodology as a result. In rare cases, these circumstances will result in the termination of an index. MSCI Private Real Estate Index users should consider this possibility including the need to terminate or modify the terms of a fund or financial product as a result of the termination of a calculation of an index.

MSCI assumes no responsibility for any potential use of its indexes by clients for a particular purpose. The effective representation of a market, market segment or strategy is the primary aim for MSCI.

BMR regulated use of any MSCI Private Real Assets Indexes, including MSCI Private Real Estate Indexes, requires a specific written permission letter from MSCI, pursuant to the process described on the index regulation section of www.msci.com. Only MSCI Private Real Estate Index clients are eligible to apply for such permission. BMR regulated use of any MSCI Private Real Assets Indexes, including the MSCI Private Real Estate Indexes, without such specific written permission is strictly prohibited.

10 ESG Disclosures

ESG disclosures are provided as per Commission Delegated Regulation (EU) 2020/1816 of 17 July 2020 supplementing Regulation (EU) 2016/1011 of the European Parliament and of the Council, as it forms part of UK domestic law by virtue of the European Union (Withdrawal) Act 2018, as regards the explanation in the benchmark statement of how environmental, social and governance factors are reflected in each benchmark provided and published.

Commission Delegated Regulation (EU) 2020/1816 includes the following sections:

- Section 1 – Consideration of ESG factors
- Section 2 – Additional disclosure requirements for EU Climate Transition and EU Paris-Aligned benchmarks
- Section 3 – Disclosure of the alignment with the objectives of the Paris agreement

Refer to Appendix II for the details on disclosure pertaining to consideration of ESG factors for the BMR Benchmarks in MSCI Property Fund Benchmark family. Section 2 is not reported as there are no EU Climate Transition or EU Paris-Aligned benchmarks in the MSCI Property Fund Benchmark Family as of the date of this report.

11 Additional Information

Detailed methodology and policy documents can be found on www.msci.com. Currently, no MSCI Private Real Estate Indexes, including BMR Benchmarks, have ISINs assigned.

DATE OF PUBLICATION: December 6, 2024

DATE OF LAST UPDATE: December 11, 2025

12 Appendix I – Key Terms

Key term	Definition
BMR Benchmark	BMR Benchmark is an MSCI Private Real Estate Index for which MSCI Limited has provided written permission in each instance to its client to be used for a BMR regulated use. A BMR Benchmark may be a Standard Index or an index calculated from a Standard Index using pre-configured specifications
Distributions	Income payable to investors during the period, gross of tax, net of expenses.
Fees	Fees charged by the fund managers for their services in the period as defined by the Fund Management Agreement. Including fees collected by third parties on behalf of the fund. The total fee comprises of general fund management fees and capital and/or expensed incentive fees.
Filter	A filter is being used to create any index subset to become a “named” sub-index of any Standard Index through the application of attribute filters (also known as a screen) to the Standard Index
Fund	A financial structure, usually in the form of a co-ownership vehicle, by which investors come together to hold real estate. The performance of a fund as obtained by its unit-holders derives not only from the properties it contains, but also from the effects of debt (gearing/ leverage), cash holdings and fees.
Frozen Index History	The case where all historical results are fixed. The addition of new data into the relevant index with frozen history will not affect the results stated for earlier periods.
Headline Measures	Headline measures are Total Return, Capital Growth and Income Return for the MSCI Property Indexes and the Total Return for the MSCI Property Fund Indexes.
Index Policy Committee (IPC)	The Index Policy Committee (IPC) is an escalation point for the PAIC.
Measure	A measure is the index series name to indicate the index calculation methodology and specifically reference a pre-defined performance measure.
Methodology	Methodology refers to rules and guidelines for determining indexes, measures or filters
Methodology Set	The set of methodology and policy documents that describe the methodology used to determine MSCI Private Real Estate Indexes, including BMR Benchmarks
Net asset value (NAV)	The total value of all the assets held in a fund, less the capitalized value of any outstanding liabilities.

Key term	Definition
Private Asset Index Committee (PAIC)	The Private Asset Index Committee (PAIC) is primarily responsible for the supervision of the design, development, approval and interpretation of the Private Real Estate Index methodologies. Decisions taken by the PAIC are the sole responsibility of its members. The committee is staffed strictly by MSCI employees.
Standard Index	A Standard Indexes is the MSCI Private Real Estate Index for a country or region with the broadest market coverage, for a specific index methodology, and for a specific reporting frequency. For example, UK Standard Indexes include, among others, the MSCI UK Quarterly Property Index, MSCI UK Annual Property Index, and MSCI/AREF UK Quarterly Property Fund Index.
Total Return	The most important measure of overall investment performance used to compare different assets across time periods. It incorporates both capital and income elements, and is calculated as the percentage value change plus net income accrual, relative to the capital employed.
Unfrozen Index History	Indexes with unfrozen history incorporate all available data, including the addition of new data providers with history, and historical data corrections regardless of the time of occurrence or threshold, at each index update

13 Appendix II – ESG Factors in the Benchmark Statement of BMR Benchmarks in the MSCI Property Fund (with Published NAV) Benchmark Family

<p>Explanation of How ESG Factors are Reflected in the Benchmark Statement of BMR Benchmarks in the MSCI Property Fund (with Published NAV) Benchmark Family</p> <p>Section 1 – Consideration of ESG Factors</p>	
<p>Item 1. Name of the benchmark administrator</p>	<p>MSCI Limited</p>
<p>Item 2. Type of benchmark or family of benchmarks</p>	<p>Private Real Estate</p>
<p>Item 3. Name of the benchmark or family of benchmarks</p>	<p>MSCI Property Fund (with published NAV) benchmark family</p>
<p>Item 4. Are there in the portfolio of the benchmark administrator any EU Climate Transition Benchmarks, EU Paris-aligned Benchmarks, benchmarks that pursue ESG objectives or benchmarks that take into account ESG factors?</p>	<p>Yes</p>
<p>Item 5. Does the benchmark or family of benchmarks pursue ESG objectives?</p>	<p>No</p>
<p>Date on which information has last been updated and reason for the update:</p>	<p>The information in this report was last updated on December 11, 2025 as a part of the 2025 annual review of the document.</p>

Explanation of How ESG Factors are Reflected in the Benchmark Statement of BMR Benchmarks in the MSCI Property Fund (with Published NAV) Benchmark Family	
Section 3 – Disclosure of the alignment with the objectives of the Paris Agreement	
a. Does the benchmark align with the target of reducing carbon emissions or the attainment of the objectives of the Paris Agreement	No
b. Temperature scenario, in accordance with international standards, used for the alignment with the target of reducing GHG emissions or attaining of the objectives of the Paris Agreement	The index methodology for this index family does not use any temperature scenario for the alignment with the target of reducing GHG emissions or attaining the objectives of the Paris Agreement
c. Name of the provider of the temperature scenario used for the alignment with the target of reducing GHG emissions or the attainment of the objectives of the Paris Agreement	The index methodology for this index family does not use any temperature scenario for the alignment with the target of reducing GHG emissions or attaining the objectives of the Paris Agreement
d. Methodology used for the measurement of the alignment with the temperature scenario	The index methodology for this index family does not use any temperature scenario for the alignment with the target of reducing GHG emissions or attaining the objectives of the Paris Agreement
e. Hyperlink to the website of the temperature scenario used	The index methodology for this index family does not use any temperature scenario for the alignment with the target of reducing GHG emissions or attaining the objectives of the Paris Agreement
Date on which information has last been updated and reason for the update:	The information in this report was last updated on December 11, 2025 as a part of the 2025 annual review of the document.

14 Appendix III – Versioning Table

Publication Date	Key Changes
13 June 2019	First release of the document that outlines the methodology documentation of the Benchmark Statements of the BMR Benchmarks in the MSCI Property Fund (with Published NAV) Benchmark Family
12 June 2020	Included Section 10 on ESG Disclosures and Appendix II on ESG Factors in the Benchmark statement of the BMR Benchmarks in the MSCI Property Fund (with Published NAV) Benchmark Family
23 December 2020	Updated Section 10 on ESG Disclosures and Appendix II on ESG Factors in the Benchmark statement of the BMR Benchmarks in the MSCI Property Fund (with Published NAV) Benchmark Family in order to align with the Commission Delegated Regulation (EU) 2020/1816
23 December 2021	Inclusion Section 3 in Appendix II regarding the disclosure of the alignment with the objectives of this Paris Alignment in order to align with the Commission Delegated Regulation (EU) 2020/1816
27 Jun 2022	<p>Clarifications to section on ESG Disclosures to reference the European Union (Withdrawal) Act 2018.</p> <p>Clarification to the text in table headers of Appendix II for explicit reference to the BMR benchmark family.</p>
6 December 2024	Changed the committee name from REIC to PAIC to align with the expanded scope of the committee.
11 December 2025	Incorporated a definition of 'Non-Significant' benchmarks. Changed the correction policies section based on the most recent updates to the MSCI Real Estate - Index Policies document.

Notice and disclaimer

The data, data feeds, databases, reports, text, graphs, charts, images, videos, recordings, models, metrics, analytics, indexes, ratings, scores, cases, estimates, assessments, software, websites, products, services and other information and materials contained herein or delivered in connection with this notice (collectively, the "Information") are copyrighted, trade secrets (when not publicly available), trademarks and proprietary property of MSCI Inc. or its subsidiaries (collectively, "MSCI"), MSCI's licensors, direct or indirect suppliers and authorized sources, and/or any third party contributing to the Information (collectively, with MSCI, the "Information Providers"). All rights in the Information are reserved by MSCI and its Information Providers and user(s) shall not, nor assist others to, challenge or assert any rights in the Information.

Unless you contact MSCI and receive its prior written permission, you must NOT use the Information, directly or indirectly, in whole or in part (i) for commercial purposes, (ii) in a manner that competes with MSCI or impacts its ability to commercialize the Information or its services, (iii) to provide a service to a third party, (iv) to permit a third party to directly or indirectly access, use or resell the Information, (v) to redistribute or resell the Information in any form, (vi) to include the Information in any materials for public dissemination such as fund factsheets, market presentations, prospectuses, and investor information documents (e.g. KILDs or KIDs), (vii) to create or as a component of any financial products, whether listed or traded over the counter or on a private placement basis or otherwise, (viii) to create any indexes, ratings or other data products, including in derivative works combined with other indexes or data or as a policy, product or performance benchmarks for active, passive or other financial products, (ix) to populate a database, or (x) to train, use as an input to, or otherwise in connection with any artificial intelligence, machine learning, large language models or similar technologies except as licensed and expressly authorized under MSCI's AI Contracting Supplement at <https://www.msci.com/legal/supplemental-terms-for-client-use-of-artificial-intelligence>.

The intellectual property rights of MSCI and its Information Providers may not be misappropriated or used in a competitive manner through the use of third-party data or financial products linked to the Information, including by using an MSCI index-linked future or option in a competing third-party index to provide an exposure to the underlying MSCI index or by using an MSCI index-linked ETF to create a financial product that provides an exposure to the underlying MSCI index without obtaining a license from MSCI.

The user or recipient of the Information assumes the entire risk of any use it may make, permit or cause to be made of the Information. NONE OF THE INFORMATION PROVIDERS MAKES ANY EXPRESS OR IMPLIED WARRANTIES OR REPRESENTATIONS WITH RESPECT TO THE INFORMATION (OR THE RESULTS TO BE OBTAINED BY THE USE THEREOF), AND TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, EACH INFORMATION PROVIDER EXPRESSLY DISCLAIMS ALL IMPLIED WARRANTIES (INCLUDING ANY IMPLIED WARRANTIES OF ORIGINALITY, ACCURACY, TIMELINESS, SUITABILITY, NON-INFRINGEMENT, COMPLETENESS, MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE) WITH RESPECT TO ANY OF THE INFORMATION. Without limiting any of the foregoing and to the maximum extent permitted by applicable law, in no event shall MSCI or any other Information Provider have any liability arising out of or relating to any of the Information, including for any direct, indirect, special, punitive, consequential (including lost profits) or any other damages, even if notified of the possibility of such damages. The foregoing shall not exclude or limit any liability that may not by applicable law be excluded or limited.

The Information, including index construction, ratings, historical data, or analysis, is not a prediction or guarantee of future performance, and must not be relied upon as such. Past performance is not indicative of future results. The Information may contain back tested data. Back-tested performance based on back-tested data is not actual performance but is hypothetical. There are frequently material differences between back tested performance results and actual results subsequently achieved by any investment strategy. The Information may include "Signals," defined as quantitative attributes or the product of methods or formulas that describe or are derived from calculations using historical data. Signals are inherently backward-looking because of their use of historical data, and they are inherently inaccurate, not intended to predict the future and must not be relied upon as such. The relevance, correlations and accuracy of Signals frequently change materially over time.

The Information may include data relating to indicative prices, evaluated pricing or other information based on estimates or evaluations (collectively, "Evaluations") that are not current and do not reflect real-time traded prices. No evaluation method, including those used by the Information Providers, may consistently generate evaluations or estimates that correspond to actual "traded" prices of any relevant securities or other assets. Evaluations are subject to change at any time without notice and without any duty to update or inform you, may not reflect prices at which actual transactions or collateral calls may occur or have occurred. The market price of securities, financial instruments, and other assets can be determined only if and when executed in the market. There may be no, or may not have been any, secondary trading market for the relevant securities, financial instruments or other assets. Private capital, equity, credit and other assets and their prices may be assessed infrequently, may not be priced on a secondary market, and shall not be relied upon as an explicit or implicit valuation of a particular instrument. Any reliance on fair value estimates and non-market inputs introduces potential biases and subjectivity. Internal Rate of Return metrics are not fully representative without full disclosure of fund cash flows, assumptions, and time horizons.

The Information does not constitute, and must not be relied upon as, investment advice, credit ratings, or proxy advisory or voting services. None of the Information Providers, their products or services, are fiduciaries or make any recommendation, endorsement, or approval of any investment decision or asset allocation. Likewise, the Information does not represent an offer to sell, a solicitation to buy, or an endorsement of any security, financial product, instrument, investment vehicle, or trading strategy, whether or not linked to or in any way based on any MSCI index, rating, subcomponent, or other Information (collectively, "Linked Investments"). The Information should not be relied on and is not a substitute for the skill, judgment and experience of any user when making investment and other business decisions. MSCI is not responsible for any user's compliance with applicable laws and regulations. All Information is impersonal, not tailored to the needs of any person, entity or group of persons, not objectively verifiable in every respect, and may not be based on information that is important to any user.

It is not possible to invest in an index. Exposure to an asset class or trading strategy or other category represented by an index is only available through third party investable instruments (if any) based on that index. MSCI makes no assurance that any Linked Investments will accurately track index performance or provide positive investment returns. Index returns do not represent results of actual trading of investible assets/securities. MSCI maintains and calculates indexes but does not manage assets. The calculation of indexes and index returns may deviate from the stated methodology. Index returns do not reflect payment of any sales charges or fees an investor may pay to purchase securities underlying the index or Linked Investments. The imposition of these fees and charges would cause the performance of a Linked Investment to be different than the MSCI index performance.

Information provided by MSCI Solutions LLC and certain related entities ("MSCI Solutions"), including materials utilized in MSCI sustainability and climate products, have not been submitted to, nor received approval from any regulatory body. MSCI sustainability and climate offerings, research and data are produced by, and ratings are solely the opinion of MSCI Solutions. MSCI India Domestic ESG Ratings are produced by MSCI ESG Ratings and Research Private Limited and offered domestically in India. Other MSCI products and services may utilize information from MSCI Solutions, Barra LLC or other affiliates. More information can be found in the relevant methodologies on www.msci.com. MSCI Indexes are administered by MSCI Limited (UK) and MSCI Deutschland GmbH. No regulated use of any MSCI private real assets indexes in any jurisdiction is permitted without MSCI's express written authorization. The process for applying for MSCI's express written authorization can be found at: <https://www.msci.com/index-regulation>.

MSCI receives compensation in connection with licensing its indexes and other Information to third parties. MSCI Inc.'s revenue includes fees based on assets in Linked Investments. Information can be found in MSCI Inc.'s company filings on the Investor Relations section of msci.com. Issuers mentioned in MSCI Solutions materials or their affiliates may purchase research or other products or services from one or more MSCI affiliates, manage financial products such as mutual funds or ETFs rated by MSCI Solutions or its affiliates or are based on MSCI Indexes. Constituents of MSCI equity indexes are listed companies, which are included in or excluded from the indexes according to the application of the relevant index methodologies. Constituents in MSCI Inc. equity indexes may include MSCI Inc., clients of MSCI or suppliers to MSCI. MSCI Solutions has taken steps to mitigate potential conflicts of interest and safeguard the integrity and independence of its research and ratings.

MIFID2/MIFIR notice: MSCI Solutions does not distribute or act as an intermediary for financial instruments or structured deposits, nor does it deal on its own account, provide execution services for others or manage client accounts. No MSCI product or service supports, promotes or is intended to support or promote any such activity. MSCI Solutions is an independent provider of sustainability and climate data. All use of indicative prices for carbon credits must comply with any rules specified by MSCI. All transactions in carbon credits must be traded "over-the-counter" (i.e. not on a regulated market, trading venue or platform that performs a similar function to a trading venue) and result in physical delivery of the carbon credits.

You may not remove, alter, or obscure any attribution to MSCI or notices or disclaimers that apply to the Information. MSCI, Barra, RiskMetrics, and other MSCI brands and product names are the trademarks, service marks, or registered trademarks of MSCI or its subsidiaries in the United States and other jurisdictions.
