Senior Managers Regime - Consultation Response to the FCA (CP19/31)

MSCI LIMITED

February 2020
Response

1. Q1: Do you agree with our assessment that benchmark administrators are unlikely to meet the criteria for Enhanced firms under the regime?
   Yes.

2. Q2: Do you agree that all benchmark administrators should be subject to the Core regime under the SMR in the first instance? If not, please explain why.
   Yes.

3. Q3: Do you agree that our waiver-based approach allows enough flexibility for benchmark administrators with different governance models? If not, please explain why.
   Any waiver-based approach should not in our view create an unlevel playing field between role-players, such as independent index providers and self-indexers within a larger organisations. In our view, the same regime should apply to all competitors.

4. Q4: What are your views on our stated approach to assessing waiver applications? Are there factors we should exclude or other factors we should include?
   Any waiver-based approach should not in our view create an unlevel playing field between role-players, such as independent index providers and self-indexers within a larger organisations. In our view, the same regime should apply to all competitors.

5. Q5: Do you agree with our proposals for applying SMFs to Core and Limited Scope benchmark administrators?
   Yes.

6. Q6: Are there any Core SMFs or Prescribed Responsibilities that should not be applied to benchmark administrators?
   No response.
Q7: In line with our approach for other FCA regulated firms, do you agree that the Conduct Rules should be applied to all employees in benchmark administrators that undertake financial service activities?

Independent index providers were not traditionally set up as regulated entities, and tend to be more globally dispersed than traditional regulated financial services firms. Further, independent index providers tend to be part of or include significant non-regulated businesses and/or product lines within their corporate structure. The effect of applying the Conduct Rules in this way means that unregulated businesses, product lines and entities are de facto regulated. The result can be anomalous, for example, in the case where there are more people in unregulated businesses being wrapped into the regime than in the regulated businesses. Not only is this potentially disproportionate, but it also creates potential issues in terms of employment law. As such, it is our view that the Conduct Rules should apply only to individuals who are involved in benchmark administration.

Q8: Do you agree that benchmark administrators should have 12 months to train other staff on Conduct Rules, in line with the extension of the regime for other FCA regulated firms?

No response.

Q9: Do you agree that the Conduct Rules should be tailored for firms that are subject to the Annex II regime under the BMR to reflect their specific treatment under the BMR?

No response.

All Information is impersonal and not tailored to the needs of any person, entity group or persons.

None of the Information constitutes an offer to sell (or a solicitation of an offer to buy), any security, financial product or other investment vehicle or any trading strategy. It is not possible to invest directly in an index. Exposure to an asset class or trading strategy or other category represented by an index is only available through third party investable instruments (if any) based on that index. MSCI does not issue, sponsor, endorse, market, offer, review or otherwise express any opinion regarding any fund, ETF, derivative or other security, investment, financial product or trading strategy that is based on, linked to or seeks to provide an investment return related to the performance of any MSCI index (collectively, “Index Linked Investments”). MSCI makes no assurance that any Index Linked Investments will accurately track index performance or provide positive investment returns. MSCI Inc. is not an investment adviser or fiduciary and MSCI makes no representation regarding the advisability of investing in any Index Linked Investments.

Index returns do not represent the results of actual trading of investible assets/securities. MSCI maintains and calculates indexes, but does not manage actual assets. Index returns do not reflect payment of any sales charges or fees an investor may pay to purchase the securities underlying the index or Index Linked Investments. The imposition of these fees and charges would cause the performance of an Index Linked Investment to be different than the MSCI index performance.

The Information may contain back tested data. Back-tested performance is not actual performance, but is hypothetical. There are frequently material differences between back tested performance results and actual results subsequently achieved by any investment strategy.

Constituents of MSCI equity indexes are listed companies, which are included in or excluded from the indexes according to the application of the relevant index methodologies. Accordingly, constituents in MSCI equity indexes may include MSCI Inc., clients of MSCI or suppliers to MSCI. Inclusion of a security within an MSCI index is not a recommendation by MSCI to buy, sell, or hold such security, nor is it considered to be investment advice.

Data and information produced by various affiliates of MSCI Inc., including MSCI ESG Research LLC and Barra LLC, may be used in calculating certain MSCI indexes.
