KEY FEATURES & BENEFITS

Consistency

MSCI uses the same guidelines² to determine the country classification of equity securities across its entire index universe. Each security is classified in one, and only one, country.

Broad Equity Universe

In addition to covering securities within the MSCI equity indexes, the MSCI Country Classification Standard also includes securities that are currently not eligible for inclusion in the MSCI Global Equity Indexes, but are tracked due to their size and liquidity.

Facilitates Reporting on Market Exposure

Due to its consistent definition of country classification for a broad set of securities, the MSCI Country Classification Standard may be used by clients to more accurately report their exposure to equity holdings that are not included in their MSCI benchmark, but are part of the MSCI equity universe.

COUNTRY COVERAGE (AS AT MARCH 6, 2014)

More than 14,000, 8,000 and 1,000 securities in the MSCI Developed, Emerging and Frontier Markets respectively are covered in the product, including over 15,000 securities that are non-MSCI index constituents.
