

Update to the Consultation on MSCI USA ESG Select Index Methodology

April 2012

msci.com

MSCI USA ESG Select Index Consultation – Key Updates

- MSCI launched a consultation on proposed enhancements to the MSCI USA ESG Select Index on February 29, 2012.
- This updated consultation document incorporates the client feedback received so far as part of the consultation. The key updates to the earlier version are highlighted below, while the rest of the document describes the proposed enhancements in further detail
- Methodology
 - MSCI proposes to use a combination of two MSCI ESG Research products for the purpose of index creation IVA ratings for overall best-in-class ESG company performance and Impact Monitor scores for identifying highly controversial company practices and business activities.
 - Companies with major business involvement in the production of products with high negative social or environmental impacts will also be captured now as part of their Impact Monitor assessment. Consequently, the ESG Screener will not be used in the construction of the MSCI USA ESG Select Index. However, companies with Tobacco involvement will continue to be excluded.
- Transition Timeline
 - Based on client feedback, MSCI proposes to transition to the enhanced methodology starting May 2012 Index Review.

Executive Summary

- The MSCI USA ESG Select Index methodology is currently based on the Global Socrates (GS) ESG ratings. MSCI intends to migrate this index to an enhanced methodology based on a new suite of MSCI ESG Research products available on MSCI ESG Research's new platform ESG Manager to increase transparency and granularity of the ESG signals while keeping the philosophy underpinning the index unchanged.
- MSCI proposes to use a combination of two MSCI ESG products for the purpose of index creation IVA ratings for overall best-in-class ESG company performance and Impact Monitor scores for identifying highly controversial company practices and business activities.
- These proposals are similar to the enhanced methodology proposal for the MSCI Global ESG Indices, on which MSCI is currently consulting with clients.*
- In addition, MSCI also proposes to reduce the current annual turnover budget from 50% to 30% (10% at Semi-Annual Index Reviews and 5% at Quarterly Index Reviews)
- Please note this consultation may or may not lead to the adoption, in whole or in part, of the proposed enhancements described herein.

* The consultation document describing these proposed enhancements in detail is available on the MSCI web site at http://www.msci.com/products/indices/consultations/

Current MSCI USA ESG Select Index Methodology

- Currently, the MSCI USA ESG Select Index is based on Global Socrates ratings.
- MSCI USA ESG Select Index is an optimization based index and aims to over-weight companies with higher ESG ratings and under-weight companies with lower ESG ratings and excludes companies with Tobacco involvement
- The index is reviewed on a quarterly basis to coincide with the Semi-Annual Index Reviews in May and November and Quarterly Index Reviews in February and August.
- At each quarterly index review, following are the optimization constraints:
 - The predicted tracking error is restricted to 1.8%
 - The maximum weight of an index constituent is set to 5%
 - The minimum weight of an index constituent is set to 0.1%
 - The number of index constituents is constrained to a maximum of 350
 - The sector weights of the MSCI USA ESG Select Index should not deviate more than +/- 3% from the sector weights of MSCI USA
 - The one way turnover of the MSCI USA ESG Select Index is constrained to a maximum of 15% at Semi-Annual Index Reviews and 10% at Quarterly Index Reviews
 - One way transaction cost is set to 0.5% which aims to achieve a balance between turnover and ESG Scores
 - An AS/CF (Asset Selection/Common Factor) Risk Aversion Ratio of 10 is applied
- The rebalancing results are announced five days before the effective date through Integrated Client File (ICF) and a Global Summary Document.

Proposal for Enhanced Methodology

- ESG performance
 - Use normalized IVA Scores in the optimization process
- Controversial business practices
 - Continue to exclude companies with Tobacco involvement
 - Exclude all constituents in the Parent Index with an Impact Monitor controversy assessment of very severe (Impact Monitor score of 0 or 1)
 - Exclude all non-index constituents with an Impact Monitor controversy assessment of severe (Impact Monitor score of 2)
- Annual turnover budget: 30% (currently 50%)
 - This would help in managing the annual index turnover, with only a very marginal potential reduction in the ESG performance of the index
 - The index turnover over the recent Index Reviews has been well below the current budget as seen in the Appendix

Transition Proposal

- MSCI proposes to transition the MSCI USA ESG Select Index to the enhanced methodology over multiple index reviews starting May 2012 Index Review
- Transition analysis using the enhanced methodology based on data as of the close of November 30 2011 is as below

| | #Current* | #Proforma** | #Deletions | #Additions |
|---------------------------|-----------|-------------|------------|------------|
| MSCI USA ESG Select Index | 179 | 155 | 48 | 24 |
| * As of 30 Nov 2011 | | | | |
| ** As of 1 Dec 2011 | | | | |

 The total turnover for the full transition is 33.4%. The turnover constraint (10% at Semi-Annual Index Reviews and 5% at Quarterly Index Reviews) will continue to apply at each Index Review.

Discussion Points

- Is the application of a higher Impact Monitor controversy assessment of very severe or severe for non index constituents appropriate?
- Is it helpful to reduce the annual turnover budget from 50% to 30%?
- What would be the appropriate timeline for the transition?

Notice and Disclaimer

- This document and all of the information contained in it, including without limitation all text, data, graphs, charts (collectively, the "Information") is the property of MSCI Inc. or its subsidiaries (collectively, "MSCI"), or MSCI's licensors, direct or indirect suppliers or any third party involved in making or compiling any Information (collectively, with MSCI, the "Information Providers") and is provided for informational purposes only. The Information may not be reproduced or redisseminated in whole or in part without prior written permission from MSCI.
- The Information may not be used to create derivative works or to verify or correct other data or information. For example (but without limitation), the Information many not be used to create indices, databases, risk models, analytics, software, or in connection with the issuing, offering, sponsoring, managing or marketing of any securities, portfolios, financial products or other investment vehicles utilizing or based on, linked to, tracking or otherwise derived from the Information or any other MSCI data, information, products or services.
- The user of the Information assumes the entire risk of any use it may make or permit to be made of the Information. NONE OF THE INFORMATION PROVDERS MAKES ANY EXPRESS OR IMPLIED WARRANTIES OR REPRESENTATIONS WITH RESPECT TO THE INFORMATION (OR THE RESULTS TO BE OBTAINED BY THE USE THEREOF), AND TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, EACH INFORMATION PROVIDER EXPRESSLY DISCLAIMS ALL IMPLIED WARRANTIES (INCLUDING, WITHOUT LIMITATION, ANY IMPLIED WARRANTIES OF ORIGINALITY, ACCURACY, TIMELINESS, NON-INFRINGEMENT, COMPLETENESS, MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE) WITH RESPECT TO ANY OF THE INFORMATION.
- Without limiting any of the foregoing and to the maximum extent permitted by applicable law, in no event shall any Information Provider have any liability regarding any of the Information for any direct, indirect, special, punitive, consequential (including lost profits) or any other damages even if notified of the possibility of such damages. The foregoing shall not exclude or limit any liability that may not by applicable law be excluded or limited, including without limitation (as applicable), any liability for death or personal injury to the extent that such injury results from the negligence or wilful default of itself, its servants, agents or sub-contractors.
- Information containing any historical information, data or analysis should not be taken as an indication or guarantee of any future performance, analysis, forecast or prediction. Past performance does not guarantee future results.
- None of the Information constitutes an offer to sell (or a solicitation of an offer to buy), any security, financial product or other investment vehicle or any trading strategy.
- MSCI's indirect wholly-owned subsidiary Institutional Shareholder Services, Inc. ("ISS") is a Registered Investment Adviser under the Investment Advisers Act of 1940. Except with respect to any applicable products or services from ISS (including applicable products or services from MSCI ESG Research Information, which are provided by ISS), none of MSCI's products or services recommends, endorses, approves or otherwise expresses any opinion regarding any issuer, securities, financial products or instruments or trading strategies and none of MSCI's products or services is intended to constitute investment advice or a recommendation to make (or refrain from making) any kind of investment decision and may not be relied on as such.
- The MSCI ESG Indices use ratings and other data, analysis and information from MSCI ESG Research. MSCI ESG Research is produced by ISS or its subsidiaries. Issuers mentioned or included in any MSCI ESG Research materials may be a client of MSCI, ISS, or another MSCI subsidiary, or the parent of, or affiliated with, a client of MSCI, ISS, or another MSCI subsidiary, including ISS Corporate Services, Inc., which provides tools and services to issuers. MSCI ESG Research materials, including materials utilized in any MSCI ESG Indices or other products, have not been submitted to, nor received approval from, the United States Securities and Exchange Commission or any other regulatory body.
- Any use of or access to products, services or information of MSCI requires a license from MSCI. MSCI, Barra, RiskMetrics, ISS, CFRA, FEA, and other MSCI brands and product names are the trademarks, service marks, or registered trademarks or service marks of MSCI or its subsidiaries in the United States and other jurisdictions. The Global Industry Classification Standard (GICS) was developed by and is the exclusive property of MSCI and Standard & Poor's. "Global Industry Classification Standard (GICS)" is a service mark of MSCI and Standard & Poor's.
